

Allison EVS Transmissions

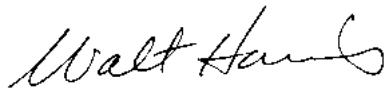

The Allison Emergency Vehicle Series (EVS) transmissions are a new generation of fire/emergency transmissions that offer increased torque and horsepower ratings to match more powerful engines.

There are four models available with ratings from 330 to 580 gross input horsepower and 985lb-ft to 1675 lb-ft of gross input torque. Power Take-Off provisions are provided on the 3000/3500 EVS and 4000/4500 EVS transmissions. See chart below for complete information as to application pages and P.T.O. mounting locations.

Transmission Model	P.T.O. Application Page	P.T.O. Mounting Pad	P.T.O. Mounting Locations (1)
3000/3500 EVS	ALL-13	10 Bolt	4 & 8 o'clock positions
4000/4500 EVS	ALL-14	10 Bolt	1 & 8 o'clock positions

(1) P.T.O. mounting locations as viewed from the rear.

Please add this bulletin to your Allison transmission index pages for quick reference.
