

New 2012 Applications Catalog HY25-3000/US

We are pleased to include with this bulletin the 2012 edition of the Chelsea Power Take-Offs (P.T.O.s) Applications catalog - HY25-3000/US dated January 2012. This catalog supersedes HY25-3000/US dated January 2010 and all supplements.

New in this catalog are the following:

1. An updated Section 2 including options and flange drawings for the 890 family, 870 family and new 511/523 rear mount P.T.O.s.
2. The Allison section has been updated to include a new chart for 890 installations.
3. New P.T.O.s includes the soon to be released 511 and 523 Series Rear Mount (Countershaft) P.T.O.s for Eaton, Volvo, ZF, Mercedes and Meritor transmissions. Watch for future bulletins.
4. For the MO38S6 DUONIC AMT transmission (MTB-12) the 447C Series Power Take-Off with all the components supplied to mount to the new transmission.

NOTE: The 890, 870, 511 and 523 Series P.T.O.s now set the industry standard for P.T.O. applications by listing ONE Torque rating for both continuous and Intermittent applications. Now there is no need to "de-rate" the P.T.O. when choosing between intermittent and continuous duty cycles.

To insure that you receive future updates to the 2012 applications catalog, please take the time to use the web link below to register you catalog.
