

FP14 Pump for 244 Series

Chelsea Products Division has released for service the FP14-95C-DF gear pump. This pump was originally designed for the 244 Series Power Take-Off (P.T.O.) used on Ford 4R100 transmissions.

The FP-14 Series of pumps were designed by Chelsea engineering as a P.T.O./Pump Package for Ford Super Duty 4 x 4 applications where there is critical clearance issues. This industry first package had a unique pump design with the inlet and outlet ports facing "down" and mounted to the P.T.O. facing the front for the vehicle for maximum hose clearance and ease of installation.

You will now be able to service older Ford Super Duties with the 4R100 transmission that require the FP14 Series pump.

Pump Size	GPM at 1200 RPM	Cubic Inch Displacement	Max PSI	Max RPM
FP14-95C-DF	9.7	1.871	3000	3000

List Price for the FP-14-95C-DF is \$931.89
