

GM 3600 SERIES TRUCKS

PTO-TEC-111
TECHNICAL

DATE: February 9, 2001

TO: All Chelsea® Power Take-Off Customers

PTO INFO

GM now offers two cab-chassis trucks for 2001, the "Classic" 3500HD cab-chassis and the New 3600 cab-chassis. The 3500HD does not offer the P.T.O. provisions as standard and only offers P.T.O. options on the New Venture Transmission (NVG-4500) (Chelsea NVG-2) with the 8.1L engine.

Power Take-Off provisions have been provided as "standard" content on the C/K 3600 (Cab-Chassis) trucks with the 8.1L Vortec (GM code L18) and 6.6L Duramax Diesel (GM code LB7) engines. P.T.O. provisions are not available on C/K 3600 trucks with the 6.0L Vortec (GM code LQ4) engines. Transmissions available are the Allison 1000 Series 5-speed automatic (GM code M74) and ZF S6-650 6-speed manual (GM code ML6) transmission.

The following charts will assist you in identifying 2001 model year GM 3600 Series trucks with the P.T.O. provisions. Vehicle Model should appear on the tire information sticker attached to the edge of the cab door opening or the vehicle build sheet. As an alternative, the vehicle VIN can be decoded to identify the NEW GM 3600. See Chart A below.

Chart A

Chassis	3500HD Cab-Chassis	New 2001 3600 Cab-Chassis
Model Designator	C31xxx	C36xxx or K36xxx
VIN (11th position)	"J" Only	"E" or "H"
GVW Rating	15K Max	12K Max

Attached to this bulletin is another chart [B] that list specific models that do and do not have P.T.O. options.
