

TORQUE VALUE FOR PRESSURE SWITCH

PTO-TEC-115

TECHNICAL

DATE: August 30, 2001

TO: All Chelsea® Power Take-Off Customers

When installing the pressure switch, part number 379502, on the 250, 251, 277, 278 or 859 Series Power Take-Offs it is important to correctly torque the switch to the proper value. If the switch is over torqued it may cause the threads to become stripped. The following torque value should be used when installing pressure switch 379502.

Torque to 10-12 Lb.ft. [1.38-1.656 Kg.m]
