

INFORMATION SECURITY MANAGEMENT SYSTEM POLICY

Parker Hareket ve Kontrol Sistemleri Ticaret Limited Şirketi (Parker Motion and Control Systems Trade Limited Company), known as the organization of Parker Hannifin in Turkey, began its operations in 2007. The company aims to offer Parker's technological know-how, high-quality service and products to Turkey's industry through a professional distribution network.

PSC Turkey pays the utmost attention to information security in order to both maintain its own business and protect the important and/or sensitive information of its stakeholders. The organization regularly conducts the infrastructural works required for the security of IT and activities required by the quality management system policies.

Beyond infrastructural measures and efforts, PSC Turkey also informs its own employees about information security and expects them to show the required sensitivity.

All employees are expected to use the company's IT resources for suitable goals and for the company's interests. Therefore, employees are expected to take the necessary measures to prevent unintended damage to the company's details and information resources, their theft or malicious use, and conform to the rules indicated in the Information Security Management System Policy. The objective of this policy is to secure not only the company's IT hardware and information assets , but also information entrusted to the company by the stakeholders. The ISMS covers all types of written, verbal and electronic information.
