

# Phastite

Permanent Tube Connection for the Process and Power Industries

Having issues with permanent connections on stainless steel tubing?

Our Phastite Tube Connections offer the installer an innovative design for a ferrule-less, push-fit, permanent tube connection. Specifically, Phastite is a reliable alternative to welded connections in pressures up to 13,300 psi

## Contact Information:

## Product Features:

- No loose parts
- Once assembled, it is a permanent connection
- Simple assembly
- Unique holding design

## Product Benefits:

- The Phastite nut is “locked” in place prior to assembly. The holding sleeve is attached. No unattached ferrules are used for holding the tubing
- Tamper proof. Leak free connection without having to weld
- Phastite tool assures connections are assembled correctly and in seconds
- Phastite “sleeve” suitable for a wide variety of tubing sizes

ENGINEERING YOUR SUCCESS.
