MATERIAL REPORT

TITLE: General evaluation of Parker Hifluor compound HF355-65.

PURPOSE: Test compound HF355-65 for resistance to high and low temperature extremes.

CONCLUSION: Parker's Hifluor compound HF355-65 offers excellent resilience and stability over a wide range of temperature environments.

Temperature Range: -15 to 400°F

Recommended For: Oils and greases made from petroleum or synthetic hydrocarbon base stock, silicone fluids, acids, bases, alcohols, ozone and weathering, aromatic hydrocarbon fuels and solvents, chlorinated hydrocarbon solvents, aggressive polar solvents (MEK, acetone, etc.), automotive brake fluid, aircraft hydraulic fluids.

Not Recommended For: Fluorinated refrigerant gases, perfluorinated ether fluids, molten alkali metals.
