

Focused On Outcomes

Better medical devices through engineering.

Parker Hannifin BioCare Business Unit directs its knowledge, products, resources and attention towards four key market segments: Respiratory, Preventative & Recovery, Bio-fluid Management and Surgical & Diagnostic Equipment. We've identified these core areas as markets having needs to which BioCare Business Unit can offer immediate and measurable solutions for our client partners.

Respiratory

The Respiratory market is a large focus area of technology and subsets. BioCare Business Unit works with all aspects of this segment to improve its products with the ultimate goal of enhancing patient care and quality of life.

The Respiratory market encompasses:

- Oxygen Therapy
- Sleep Apnea
- Aerosol

Preventative & Recovery

BioCare Business Unit is uniquely suited to bring substantial innovation to the Preventative & Recovery products market. Our engineers utilize today's technology to improve patient outcome.

The Preventative & Recovery market encompasses:

- Pre and Postoperative Temperature Management
- Therapeutic Compression Therapy
- Alternating Support Surfaces

Bio-fluid Management

As a part of Parker, the world leader in fluid control systems, BioCare Business Unit is particularly well versed in the needs and challenges associated with fluid handling products. Developing fluid related technology is the very foundation of all we do.

The Bio-fluid Management market encompasses:

- IV Therapy
- BioMedia Bags
- Operating Room
- Suction Therapy
- Wound Therapy

Surgical & Diagnostic

The race for improved patient care devices, especially those directly related to surgery and diagnostic, is more rapid than ever before. Partnering with BioCare Business Unit can provide your engineers with an intellectual and technological advantage. By coupling our ideas together, we can achieve significant, quantifiable enhancements to your existing products and products in development.

The Surgical & Diagnostic market encompasses:

- Surgical Tools
- Imaging Equipment
- Home Diagnostic Equipment
- Advanced Prosthetics
