**Series MX** Miniature Pneumatic Solenoid Valve

10 mm Solenoid-Actuated Poppet Valve

The Series MX is a miniature solenoid valve that delivers high flow at low pressure in a compact, 10 mm wide size. Using hit and hold control, the Series MX miniature solenoid consumes very little power helping medical device manufacturers increase battery life and reduce system weight without sacrificing performance. The universal design supports manifold or barbed-tube mounting and is available in 2-way and 3-way configurations. The Series MX solenoid valve is an ideal solution for portable medical devices with limited space and power.

**Features**
- Small, 10 mm size enables compact integration and reduces device size
- Highest flow to power consumption ratio increases device battery life
- Lightweight 0.3 oz (8.5 g) design helps reduce portable device weight
- Universal barbed-tube or manifold mount eases valve integration
- CE and RoHS compliant

**Applications**
- Oxygen Concentrators
  - Sieve bed switching/equalization
  - Oxygen delivery
- Deep Vein Thrombosis
  - Cuff Inflation/Deflation Control
- Negative Pressure Wound Therapy
  - High Volume Vacuum/Pressure Control

**Media:** Non-Reactive gases

**Operating Environment:**
41 to 122°F (5 to 50°C)

**Storage Temperature:**
-40 to 158°F (-40 to 70°C)

**Dimensions:**
- Length: 1.50 in (38.1 mm)
- Width: 0.40 in (10.1 mm)
- Height: 0.62 in (15.7 mm)
  - to Barb End / 0.44 in (11.1 mm)
  - to Manifold Face

**Valve to Valve Spacing:**
0.400 in (10 mm) center

**Porting:**
- Barbs for 3/32 in (2 mm)
- I. D. Tubing
- Manifold Mount

**Weight:** 0.3 oz (8.5 g)

**Internal Volume:** 0.01247 in³ (0.2043 cm³)

**Filtration:** 40 micron recommended

**Electrical**

**Power Options (Hit/Hold):**
- 6 psid model (1.0/0.25 Watt)
- 15 psid model (2.0/0.5 Watts)
- 30 psid model (3.0/0.75 Watts)

**Voltage Options:**
5, 12 or 24 VDC

**Series MX Model 7 is not rated for continuous duty and must employ hit and hold control.**

**Electrical Connections:**
- 2-Pin PCB (for PCB solder connection)
- 2-Pin Up (for connector interface)
  0.30 in (7.6 mm) pin centers
  (Lead Wire/Connector Assembly available, see ordering information)

**Wetted Materials**

**Body/Plunger:**
- PPE/PA (Polyphenylene Ether/Polyamide)

**Armature:**
- 430 FR Series Stainless Steel

**Seal (Options):**
- Silicone (6 PSI Only), FKM

**Other:**
- 302/304 Series Stainless Steel
- EPDM (Manifold Gasket)

**Performance Characteristics**

**Leak Rate:** Tested with Air
<0.2 sccm

**Response:**
< 20 ms maximum cycling

**Pressure/Vacuum:**
- 0 to 6 psid (0.4 bar differential)
- 0 to 15 psid (1.0 bar differential)
- 0 to 30 psid (2.0 bar differential)

**Proof Pressure:**
100 psig (6.9 bar)

**Typical Flow:**
- 17.5 slpm @ 6 psid
  (0.4 bar differential)
- 30 slpm @ 15 psid
  (1.0 bar differential)
- 48 slpm @ 30 psid
  (2.0 bar differential)

**Orifice Sizes/Equivalent Cv:**
0.075 in (1.91 mm) / 0.072

**Reliability:**
- Life Cycle rating of 25 million
  (worst case tested)

Parker
Series MX Miniature Pneumatic Solenoid Valve

Installation and Use

Hit and Hold Specifications

The Series MX valve is designed for use with “Hit and Hold” control.

Hit and Hold is a common control method used to reduce component power consumption without sacrificing performance. The “Hit” or “Spike” state refers to the rated voltage required to actuate the valve. The “Hold” state is a substantial reduction in the rated voltage (normally 50% of the rated voltage) that maintains the valve in an actuated state.

Hit and Hold control can be incorporated using several different approaches, including discrete component circuits or programmable logic. The graph below illustrates the typical “Hit” and “Hold” control method.

![Voltage vs. Time Graph](image)

This method greatly reduces power consumption because the valve only draws full current for a short period of time (in this case, a minimum of 50 msec), making it ideal for applications with sensitive power budgets.

Rated voltage must be applied to the Series MX valve for a minimum of 50 msec to ensure full valve actuation in all operating conditions.

Important Note:
The Series MX valve is not designed for continuous use at rated voltage. Therefore, rated voltage should not be applied for greater than 20 seconds. Exceeding rated voltage for longer than 20 seconds may adversely affect valve performance. Contact factory for more details.

## Accessories

**Manifold Rubber Gasket (EPDM)**
- 00444-05-E099
  (required for manifold mounting and supplied with each valve)

**12” (30 cm) Wire Leads**
- 290-006061-002
  (for use with 2-Pin Up valve configuration)
  Note: Not Included with valve

**Screw 2-56 x 1/2” Pan Head, Phillips**
- 191-000112-008
  (see valve mounting requirements above)
  Note: Not Included with valve
