Parker HP1 Series
Integrated Hydrostatic Pumps

**Benefits for OEMs**
The compact HP1 integrated pump enables manufacturing cost reduction, while delivering the highest durability in class. High serviceability and ease of maintenance, with extended oil change intervals, lower the cost to own to the end-user. The integrated HP1 compact design, including mounting and displacement options, mean more design flexibility for power system design and specification, translating to potentially more efficient power to weight ratios.

**Benefits for Turf Owner/Operators**
The HP1’s compact design means more efficient power generation and less weight. Owner/Operators can spend more time cutting and less time in maintenance because the HP1, when filled with HT-1000 engineered hydraulic fluid, easily achieves 1,000 hours between fluid replacements.

**Integrated Design Features:**
- Single hydraulic pump
- Integrated reservoir
- Integrated filter
- 1300 psi continuous
- 3000 psi intermittent

**Built-in mounting option A:**
2-bolt, tapped side (beside ports)

**Built-in mounting option B:**
4 bottom studs

Parker HP1 Series
Integrated Hydrostatic Pumps

HP1 Value Proposition

Compact design saves space
• Fits in small machine platforms where space is limited

Modular system provides ultimate design flexibility
• Easily connects to various Parker Torqmotors
• Pump & motor selections to meet torque & speed desired

Pump designed for superior performance, longer life
• Cylindrical roller type main pump bearing - 21% more load carrying capacity to withstand higher pressures and provide longer life.

No external filter or reservoir is required
• Eliminates hoses, clamps, hardware, & assembly time required for external filter and reservoir.
• Provides for easier installation & assembly

Lower engine mounting means lower machine center of gravity
• Patented bottom pulley mount helps make possible

Use with Parker HT-1000 oil to reduce maintenance
• HT-1000 engineered oil extends change interval to 1000 hours

Easy manual operation of flip-lever bypass, no tools required
• Easy to move machine when powered operation is not possible

Complete Parker drive solution capability.
• Pump, motors, hoses, fittings, fluid can be packaged as needed
• Complete packaged solution has up to 2000 hour warranty

Parker HT-1000 has a unique additive chemistry designed to maximize oil life while providing optimum anti-wear protection for the components of today’s advanced hydrostatic drive systems. Engineered to permit change interval to 1,000 hours.

WARNING
This product can expose you to chemicals including lead which is known to the State of California to cause cancer, and DEHP which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.
