

Fuel Dispensing Filtration

FBO-14-DPL Fuel Filter Water Separator
For Diesel Refueling Station

Market Application Publication

The Challenge

Guilford County was having difficulties filtering water and contaminants from the diesel pumps used to refuel their EMS vehicles.

Why Racor was Chosen as the Solution

With the help of distributor Diesel Equipment, Guilford County installed Racor's FBO-14-DPL units. The FBO-14-DPL units provide easy installation, easy service and outstanding water removal capabilities. The ability to drain water and extend filter life were also great benefits.

Contact Information

Product Features

- Coalescing options
- High-capacity
- Ease of service
- Die-cast aluminum head
- Steel bowl assembly
- Powder coated components

ENGINEERING YOUR SUCCESS.

How the Racor Solution Protects the Engine

Fuel enters the FBO filter system, where Racor engineered media stops water and particulates. The result is clean, dry fuel being dispensed from the fuel pump. In turn, the cost effective pre-filtration system provides clean, dry fuel to engine. Several options of elements are available to meet any diesel fuel filtration requirements.

Filter Cartridge Chart

FBO	Micron Rating	Water Separator	Silicone Treated Filter	Water Absorber
 <p>FBO-10 (6 X 10 Element)</p>	1	FBO 60327	FBO 60330	FBO 60333
