

LORD® 2232 Solvent

Description

LORD® 2232 solvent is used to reduce viscosity of LORD 2232 silver conductive coating for dip applications.

LORD 2232 solvent is specifically designed for use with LORD 2232 silver conductive coating only. Do not use LORD 2232 solvent to dilute other LORD conductive coatings.

Features and Benefits

Improves Application – when used in LORD 2232 silver conductive coating, improves properties for dip application and provides better control of application film thickness.

Application

Mixing – Premix LORD 2232 silver conductive coating before adding solvent. Refer to LORD 2232 silver conductive coating data sheet for mixing instructions.

Slowly add solvent, 0.5% by volume, while stirring the mixed coating.

Shelf Life/Storage

Shelf life is one year from date of shipment when stored at 25°C in original, unopened containers. Do not store or use near heat, sparks or open flame.

Cautionary Information

Before using this or any LORD product, refer to the Safety Data Sheet (SDS) and label for safe use and handling instructions.

For industrial/commercial use only. Must be applied by trained personnel only. Not to be used in household applications. Not for consumer use.

Typical Properties*

Appearance	Clear Liquid
Viscosity, cps	>10
Density, kg/m ³ ASTM D 1475-85	0.91
Flash Point, °C ASTM D 3278-82, Closed Cup	27
Volatile Organic Content (VOC), g/L ASTM D 3960-87	906

*Data is typical and not to be used for specification purposes.

LORD TECHNICAL DATA

Values stated in this technical data sheet represent typical values as not all tests are run on each lot of material produced. For formalized product specifications for specific product end uses, contact the Customer Support Center.
