

249V Kit Program

The Parker Chelsea Division is pleased to introduce a new kit program. This is for the 249V, which is our 249 series with the integrated vane pump. This unit is now available less the vane cartridge giving you the ability to improve your inventory flexibility by stocking a base unit less cartridge and then stocking cartridges at different flow rates. To order this option add “IT” into the output option as shown below.

249FMLLX-BVIT

**available with all mounting and shift options.*

As in all our kit PTOs, you can still order variable Mounting and Shift options less the cartridge.

Shown below are the cartridge part numbers, displacements, and list prices. The base PTO price is included in the 2018 Price List Catalog as **VIT** in the Output Option section of the 249V page.

Cartridge Part Number	Displacement per Revolution	List Price
380418-08	1.61 Cubic Inch	\$1,511.49
380418-10	2.08 Cubic Inch	\$1,547.47
380418-12	2.26 Cubic Inch	\$1,583.47
380418-14	2.81 Cubic Inch	\$1,619.44
380418-17	3.56 Cubic Inch	\$1,657.47
380418-20	3.89 Cubic Inch	\$1,695.41
380418-22	4.29 Cubic Inch	\$1,735.40
380418-25	4.84 Cubic Inch	\$1,775.38

In addition to improving your application coverage with less inventory costs, you also have:

- **Quietest PTO on the Market for Ford Super Duty trucks**
- **Best in class flow for both 2 and 4-Wheel Drive trucks**
- **Best in class pressure ratings (up to 4,000 PSI intermittent)**

PLEASE NOTE: The use of any vane cartridge other than a genuine Parker cartridge will void the warranty of the **PTO AND VANE PUMP** portion of the 249V Series.
