Fluid Analysis

Device calibration
and particle counting

Customer benefits:

- Analysis of fluid condition identifies problems before they happen and saves downtime
- Certification of fluid cleanliness levels simplifies future problem investigation
- Early warning o help prevent catastrophic failure in critical systems
- Accurate results in 24 - 48 hours
- Ensures compliance with customer cleanliness requirements and specifications
- Monitors new equipment warranty compliance
- New oil cleanliness testing

www.parker.com

Features:

- Complete laboratory analysis performed on a small quantity of fluid
- Sampling bottle and pre-addressed container supplied
- Spectrochemical analysis of over 20 wear metals and additives
- Particle count reported as ISO cleanliness code over five size ranges
- Viscosity at 40°C, 100°C, Viscosity Index and TAN are reported
- Water content is expressed as a % of volume
- Analysis recommendations summarises test results and indicates what action should be taken to prevent any potential problems
- Fast turnaround—test results are mailed back to you within 24-48 hours from receipt of sample. 7 days for tests including Spectro-chemical analysis
