

Repair Location Finder / Quick User Guide

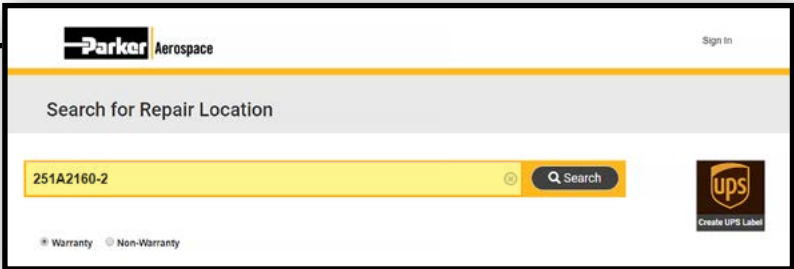

The **Parker Aerospace repair location finder** is a tool that provides the repair address for Parker Aerospace parts to support the quickest turnaround time. It's easy to use; all you need is a Parker Aerospace part number or description and with a few clicks you will know the correct location to ship the part.

The repair location finder helps eliminate confusion, speeds the time of your repair, and is available anywhere you have internet access. Simply follow the steps outlined below or contact your Parker Aerospace representative for further assistance.

Step 1

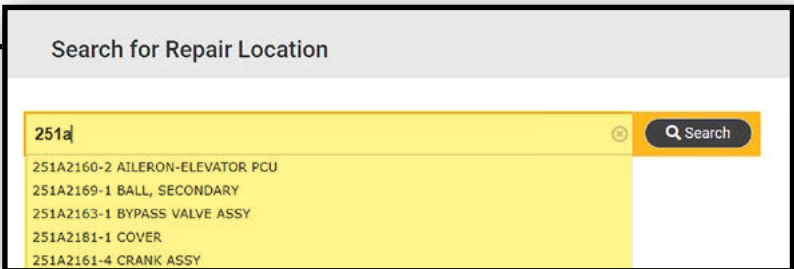

Go to the Parker Aerospace repair location finder website <https://parker.com/CSOrepair>

NOTE: You can also find a link on the CSO division home page

Step 2

Start typing the part number or description, and then select the part of interest from the drop-down menu that appears

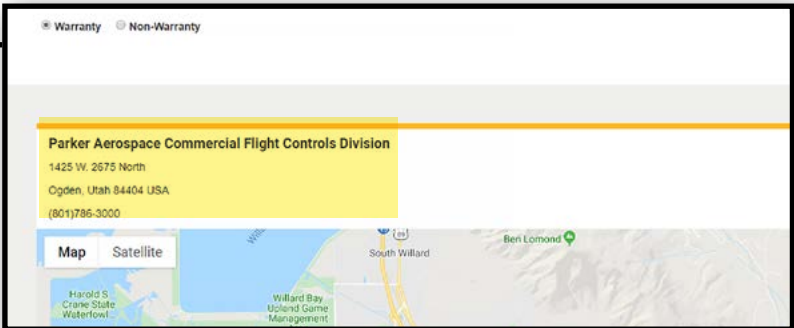

Step 3

Select whether your item is a warranty or non-warranty return

Step 4

Location information will appear

Create UPS label (optional)

If you would like to create a UPS label for your shipment (to further simplify return) please select the UPS button from the repair location finder screen.
