The salesperson will help you complete the necessary paperwork, and will also help you return the suspected defective product to Baldwin for analysis.

Warranty Fulfillment
If Baldwin finds that a returned product does not meet the warranty stated above, Baldwin will promptly replace the defective product. Baldwin’s warranty fulfillment obligations above do not apply if: a) the product is not returned to Baldwin for analysis, b) Baldwin finds that the product was not defective, c) the product was improperly installed or used, d) the product was re-used or not replaced inside a normal service interval, or e) the product is tampered with or damaged in a manner that may inhibit Baldwin’s ability to conduct a warranty investigation.

The above warranty and warranty fulfillment obligations are exclusive and in lieu of all other warranties or related remedies. Baldwin is not liable for indirect, incidental, punitive or consequential damages arising in any way from the products it manufactures or sells.

NOTES

PRODUCT INVESTIGATION

Procedure for Service Engineering Product Investigation

This procedure outlines the steps necessary for Baldwin Filters Service Engineering to complete an investigation of products from the field. The steps of this procedure are necessary to provide the most accurate and timely investigation possible.

If a filter is suspected of causing a failure, don't throw away the evidence. In order to process a warranty claim, follow the Product Investigation Procedure . . .

1. Complete a Field Report Form (Form 387) (see next page). Describe the events on a separate sheet.
2. Obtain a sample of oil, fuel or coolant in the system at the time of the failure.
3. Save damaged parts for evidence of the claimed damage.
4. For an air filter, cover the open end(s) with tape to prevent dust from entering the element during shipping.
5. Send copies of any repair bills.
6. Send the entire suspect filter, including the gaskets.

If the investigation is being requested for warranty consideration, repair bills (not estimates) should also accompany the request. Damaged equipment components such as bearings, liners, etc. should be retained by the customer for possible examination by Service Engineering.

Filter products are NOT to be cut open or otherwise tampered with. This may prevent objective analysis and testing, and may void the warranty.

Notice of damages and claims should be made immediately when the damage occurs. Every claim will receive careful and objective consideration. If a Baldwin product is proven to have caused damage, Baldwin will pay the cost required to repair the equipment to its condition at the time the failure occurred. Liability payment will not include consequential damages such as downtime, motel bills, etc.

Unit #	Make/Model of Unit	Usage	Lube Filter	Qty	Fuel Filter	Qty	Air Filter	Qty	Hydraulic Filter	Qty	Other Filter	Qty	Other Filter Description

There are many filter options offered by equipment manufacturers during a given production year. It is impossible to be certain that all equipment of the same make and model will have the same engine, requiring the same filters. Please identify each engine manufacturer and model, and include OEM number, when possible, to help with the identification process. For these reasons, and because we have no control over the methods used to gather the information on this survey, Baldwin Filters cannot be responsible for misapplications of filters.
