PF46287

FUEL/WATER SEPARATOR ELEMENT

Baldwin Filters' PF46287 Fuel/Water Separator Element features a one-piece end cap design. As the filter captures contaminants, the fuel level rises. When the fuel reaches the indicator arrows located evenly around the filter, the filter should be replaced. This innovative design helps maximize filter life, protect the engine from harmful contaminants, and reduce total maintenance costs.

(With Keys)
for use in
Davco® Fuel Pro® 387
