

PHD Software Release V2.11 Updates
May 8, 2026

PHD Update V2.11 for the PHD Mobile Displays, Includes the following updates:

- PHD Firmware Update V238 for PHDs.

These updates should be used with the latest PHD Packager, v 1.13.0.91.

Additional information, including the PHD User Guide, API Manual and PHD Packager can be found at

www.parker.com/phd

The PHD Update file: PHD_system_update_238_Parker_tar.bz2.phd.gpg

Includes the following updates and bug fixes:

- Fixed a potential, but unlikely issue, where the touch could become not responsive on the PHD28 and PHD50.
- Fixed a rare issue where periodic J1939 messages would stop transmitting after the unit had run continuously for more than one month.
- Implemented CANOpen stack enhancements to reduce CPU utilization under heavy CAN bus load.
- Improved handling of Persistent Data Storage (PDS) data to help make data storage more robust.
