

Offshore and Onshore Solenoid valves

PARKER FCSE

The FCSE 8120UK Catalogue is a selection of Parker FCSE products dedicated to Oil & Gas Market. General catalogue FCSE is also available and contains a comprehensive list of Parker Fluid Control Products for other markets and general purpose applications.

WARNING - USER RESPONSIBILITY

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

- This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.
- The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.
- To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

Who we are?

The Fluid Control Solution Europe (FCSE) is a Business Unit of Parker Hannifin, the global leader in motion and control technologies.

Our core competence is the development and manufacturing of an extremely diverse range of fluid control products, including solenoid valves and pressure regulators.

Fluid Control Solutions Europe is integrating in its offering the Lucifer® and Skinner® brands, following the acquisition by Parker in the 90s. A wide selection of Lucifer® and Skinner® branded products is included in this literature.

Where we are?

Our European headquarters are located in Gessate (Milan-Italy), this is also where our R&D, Marketing, Application Support and Product Management functions are located. Our Products are mainly manufactured in Gessate (Milan-Italy). The Parker Sales Companies and comprehensive distribution network support you, wherever you are.

History

Parker FCSE has been a leading player in the manufacturing and development of solenoid valve technologies for over 60 years, with continuous research and development bringing innovative solutions to the marketplace, for example leading the way in the utilisation of synthetic ruby for critical water applications or the unsurpassed reliability and precision of our pressure regulators. The expertise accumulated and developed through the years is evident in the superior quality of our solutions.

Markets

Our products are typically designed for markets including Industrial Equipment, Industrial Automation, Mobile, Transportation, Life Sciences, Food & Beverage and for Fluid and Process Control.

Benefits

The modular concept of our products, having separate solenoid valves and electrical parts, provides the customer with increased flexibility by allowing numerous combinations. This additional flexibility can enable distributors to greater reduce valve inventory levels, whilst retaining the same number of capabilities. Parker also has unrivalled experience in developing customised product solutions complying with the highest technical, environmental, energy and service life requirements.

PARKER FCSE - MILAN - ITALY

Heavy Duty, Corrosion Resistant for Hazardous Areas

Extremely severe operating conditions prevailing in the offshore applications, safety and hazardous area requirements imply design features not generally found in conventional solenoid valves.

The 316 stainless steel range of solenoid valves described in this brochure are the result of many years cooperation between offshore operators and Parker, a worldwide leader in design and development of high technology solenoid valves.

Parker products follow a severe Quality Assurance and materials traceability program. They are supplied with corresponding certificates.

Used or specified as actuator control or fail-safe valves. We offer many different protection solutions ("ia", "d", "e" & "mb"), according to ATEX and IECEx certification.

We provide the ultimate in quality, reliability and safety: AK7 certified (valves X), working in SIL 2 & 3 loops (valves F, V & X).

Technical Data

Common features:

Poppet design.

Safe body working pressure:

10500 kPa /105 bar for F, V and X valves types (except U033X5195 valve: SBWP = 15 bar)

Valve mounting:

- direct pipe mounting: valves V and X
- Sub-base mounting (or flanged): valves F + 3 valves X references

Mouting position:

Indifferent

Body material:

316L Stainless steel

Valve trim (gasket) material:

Buna (NBR), Viton (FKM), Polyurethan (PUR), Silicon (VMQ)

Seat discs material:

Stainless steel (valves F & V), polyamid-imid (valves X)

Medium:

Instrument or industrial air, dry or lubricated, nitrogen (121V... valve)

Filtration:

50µm or better

SIL grade:

All the parts included in this catalogue are SIL Certified through an external notified body.

Applications

- Pneumatic Actuator control.
- Fail-safe function of main ON/ OFF or modulating valves. The main valve keeps its safe position in case of current failure. Fail-safe valves are either electrically (U)133X, or manually (U)033X resettable.

Benefits

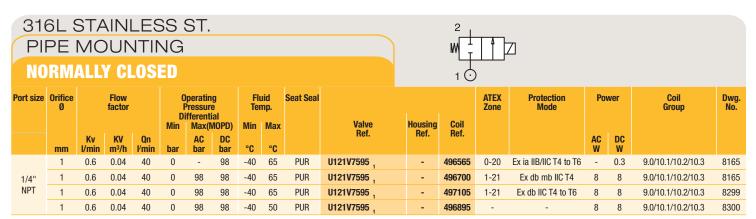

- Extensive range of ATEX and IECEx certified coils fully complying to stated EN and IEC standards.
- A completely traceable manufacturing programme together with 40 years field proven technology in the Offshore Industry.
- Complete range of corrosion resistant valves together with cutting edge low temperature valves technology.
- Corrosion resistance (Stainless steel 316 L material)

(1) Valve temperature range:

The valve temperature range (TS) is determined by the selected seal material , the temperature range for proper operations of the valve and sometimes by the fluid

(2) Operator ambient temperature range:

The operator ambient temperature range is determinated by the selected power level and the safety code.

Coil Availability

COILS

COIL GROUP

10.1

COILS FOR DIN PLUG CONNECTION

COIL FOR OIL AND GAS 37 mm

This coil can be mounted with every Parker solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

This is an encapsulated assembly comprising a coil, integral magnetic iron path and snap-on plug connection.

The synthetic material encapsulation provides an effective compact housing, offering full protection against dust, oil, water, etc.

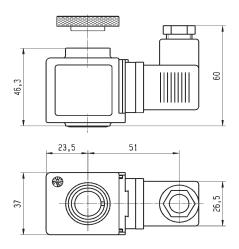

Ease of mounting in confined space - offers shock and corrosion protection - simplifies conversion of existing equipment to other requirements, etc.

Coils conform to the IEC/CENELEC safety standards and complies with European lowvoltage directive. DIN plug connector included (The AC electrical connection is delivered with a rectifier bridge).

Specification			Coil for Oil and Gas

To Order a Coil choose Coil Ref + Voltage Code, example: 496895 for 24 VDC = 496895C2 More voltage possibilities can be found in the table of voltage codes at the end of the coil section. The fixing nut (housing kit) is already inclued in the coil kit.

10.3

FLAMEPROOF ELECTRICAL PARTS "db"

497105 & 497105.02 - ELECTRICAL PARTS

These coils can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex db IIC T4 / T5 / T6 is required.

Benefits: Rotatable 360°, stainless steel with internal and external screw terminals for earth connection.

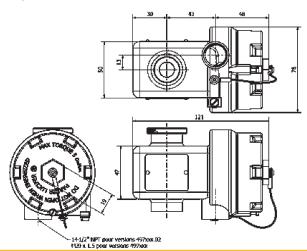

Small size for ease of mounting in confined space. Simplifies conversion of existing equipement to hazardous area requirements.

Coil delivered with an individual material traceability certificate (3.1 following EN10204)

10.2/10.1

FLAME PROOF ENCAPSULATED ELECTRICAL PARTS "db mb"

496700 - ELECTRICAL PARTS 37 mm

These coils can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex db mb IIC T4 to T6 is required.

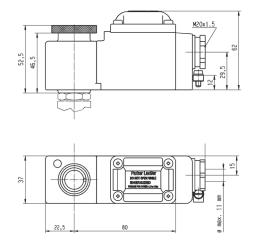

Benefits: Rotatable 360° fibreglass-reinforced plastic housing (class H). Solenoid coil, rectifier (silicium diodes), fuses and varistor protection are completely encapsulated into the coil housing by epoxy resin for shock and corrosion protection.

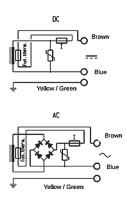

The plastic housing is delivered with 1/2" NPT or M20 x 1.5 threaded hole for wide range of cable glands. Small size for ease of mounting in confined space.

9.0

INCREASED SAFETY AND ENCAPSULATED ELECTRICAL PARTS "eb mb"

492210 - ELECTRICAL PARTS "BOOSTER" 50 mm

These coils can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection - Ex eb mb IIC T5/T6 is required.

Benefits: Rotatable 360° fibreglass-reinforced plastic housing. Solenoid coil, fuses and varistor protection are completely encapsulated into the coil housing by epoxy resin for shock and corrosion protection. Small size for ease of mounting in confined space.

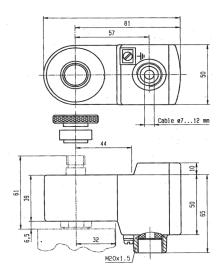

Simplifies conversion of existing equipment to hazardous area requirements.

Available only in 24 VDC (suffix code: C2)

Indications:

Booster for Offshore valves

These electrical parts need an external fuse of $I=100\ mA$

10.2/10.1

FLAME PROOF ENCAPSULATED ELECTRICAL PARTS "db mb"

496555 - ELECTRICAL PARTS 37 mm

These coils can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex db mb IIC T4 to T6 is required.

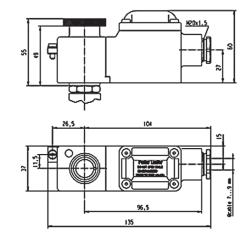

Benefits: Rotatable 360° fibreglass-reinforced plastic housing (class H). Solenoid coil, rectifier (silicium diodes), fuses and varistor protection are completely encapsulated into the coil housing by epoxy resin for shock and corrosion protection.

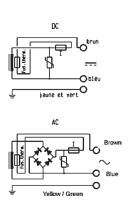

The plastic housing is delivered with M20 \times 1.5 cable gland certified for use "db" protection. Small size for ease of mounting in confined space.

INTRINSICALLY SAFE **ELECTRICAL PARTS**

492965 ELECTRICAL PART "BOOSTER" "IS" 50 mm

This coil can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

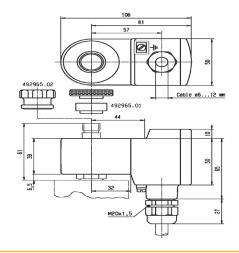

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex ia IIC - T6 is required.

Benefits: Rotatable 360° fibreglass-reinforced plastic housing. Solenoid coil, fuses and varistor protection are completely encapsulated into the coil housing by epoxy resin for shock and corrosion protection. Small size for ease of mounting in confined space. Simplifies conversion of existing equipment to hazardous area requirements.

Reference			492965.01 - (Stainless steel fixation) 492965.02 - (Plastic fixation)					
Certif	icate		LCIE 02 ATEX 6066 X - IECEx LCI 07.0007 X

Respo	onse time		2 - 4 s					
Weigh	nt		500 g					

To Order a Coil choose Coil Ref + Voltage Code, example: 492965.01 for 28 VDC = 492965.01N7

Important

The intrinsically safe supply circuit should have enough capacity in all environmental conditions to assure a minimum operating current of 29 mA through the coil.

The minimal holding current is 20 mA.

For the barrier compatibility see the corresponding table in appendix section.

12.0

INTRINSICALLY SAFE **ELECTRICAL PARTS**

482870.01 ELECTRICAL PART "IS" 50 mm

These coils can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where an explosionproof protection Ex ia IIC or IIB T6 is required.

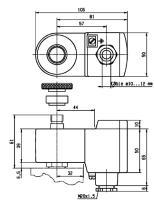

Benefits: Rotatable 360° housing, polyamid with fibreglass housing and cover. Coil, electronic circuits and other elements required for intrinsic safety are completely encapsulated in the housing with epoxy material for shock and corrosion protection.

Weigh	nt			500 g			

To Order a Coil choose Coil Ref + Voltage Code, example: 482870.01or 28VDC = 482870.01N7

Important

The intrinsic safety supply circuit must have sufficient capacitance in all ambient conditions to guarantee a minimum operating current in excess of 29 mA across the coil.

The minimum current for holding in the energised position is 20 mA

For the barrier compatibility see the corresponding table in appendix section.

10.1

INCREASED SAFETY AND ENCAPSULATED ELECTRICAL PARTS "eb mb"

492310 - ELECTRICAL PARTS 50 mm

This coil can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex eb mb II T4 to T5 is required.

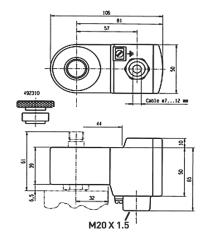

Benefits: Rotatable 360° fibreglass-reinforced plastic housing. Solenoid coil, rectifier (silicium diodes), fuses and varistor protection are completely encapsulated into the coil housing by epoxy resin for shock and corrosion protection.

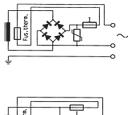

Small size for ease of mounting in confined space.

Reference				492310				
Certificate				LCIE 02 ATEX 6023 X - IECEx LCI 06.0011 X				
Coil group				10.1				
Type	Type of protection Gas			II 2 G - Ex eb mb II T4 / T5				
Dust			Dust	II 2 D - Ex tb IIIC - T130°C / T95°C				
Degree of protection				IP66 according to IEC/EN 60529 Standards				
Ambia	Ambiant temperature			-40°C to +75°C / to +40°C The operating temperature of the valve/coil can be limited by that of the valve				
Class	Class of insulation			F 155°C				
Electr	Electrical connection			Connection box with terminals and cable entry via gland M20 x 1.5 - Possibility for additional earth via external screw.

To Order a Coil choose Coil Ref + Voltage Code, example: 492310 for 24 VDC = 492310C2

9.0

INTRINSICALLY SAFE ELECTRICAL PARTS "ia"

496565 ELECTRICAL PARTS "BOOSTER" "IS" 37 mm

This coil can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex ia IIC T4 to T6 is required.

Benefits: Rotatable 360° fibreglass-reinforced plastic housing (class H).

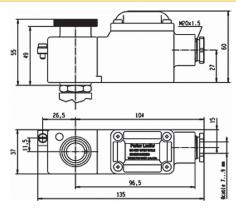

Solenoid coil, rectifier (silicium diodes), fuses and varistor protection are completely encapsulated into the coil housing by epoxy resin for shock and corrosion protection.

The plastic housing is delivered with M20 x 1.5 cable gland. Small size for ease of mounting in confined space. Available only in 28 VDC (code: N7).

Reference		496565				
Certificate		LCIE 08 ATEX 6071 X - IECEX LCI 08.0030 X				
Coil group		9.0				
Type of protection Gas		II 1 G - Ex ia IIC - T4 / T5 / T6				
Type of protection	Dust	II 1 D - Ex ta IIIC - T80 / T95 /T130°C				
Degree of protection		IP67 according to IEC/EN 60529 Standards				
Ambiant temperature		$^-$ 40°C to +80 / 75 / 65°C The application might also be limited by the temperature range of the valve.				
Electrical connection		Cable connection through a plastic cable gland M20 x 1.5 allowing use of cable diameter from 7 to 12 mm. Additional earth connection possible with external screw terminal.				
Class of insulation		H180°C				
Minimum Courant of fund	ction	20 mA				
Minimum voltage of function at 60°C		28 VDC (N7)				
Safety parameters Maximum acceptable values: Ui (V) / Ii (mA) / Pi (W)		28 V / 110 mA / 0.77 W 27 V / 120 mA / 0.81 W 26 V / 135 mA / 0.88 W 25 V / 150 mA / 0.94 W 24 V / 170 mA/ 1.02 W	28 V / 280 mA / 1.96 W 27 V / 320 mA / 2.16 W 26 V / 350 mA / 2.27 W 25 V / 390 mA / 2.43 W 24 V / 430 mA/ 2.58 W			
Line check		4 mA or 5 VDC max				
Apparent Impedance Typ. Apparent Inductance Apparent Capacitance		Attraction $\sim 600~\Omega$ - Holding $\sim 570~\Omega$ 0 mH $_0$ µF				
Response Time Typ.		2 - 4 s				
Weight		500 g				

To Order a Coil choose Coil Ref + Voltage Code, example: 496565 for 28 VDC = 496565N7

Quality

Quality Assurance

Each valve carries its own identification number. It is sent out from the factory with a Quality Assurance Certificate ensuring the following:

Strategic Parts Identification

Strategic parts, i.e. parts which are directly involved in the valving process are identified. Materials traceability of all identified parts is assured back to source.

Identified stainless steel parts have either a EN10204.3.1B declaration or a supplier's attest.

Final Test declaration

Confirms correct valve function at minimum and maximum rated pressures, with specified mains supply rating and checks that the maximal external & internal leakage rates values respect the valves specifications.

Certificate

Our organization is in compliance with ISO9001/14001 and OHSAS18001.

ATEX and IECEx certified electrical parts

Parker has a large range of certified coils working in hazardous locations (gaz and dust environment), for surface applications (Ex II).

The different existing technical solutions (ATEX & IECEx protection modes "ia", "d", "e" & "mb") allow our customers to face to every specific request.
