

## Parts & Accessories

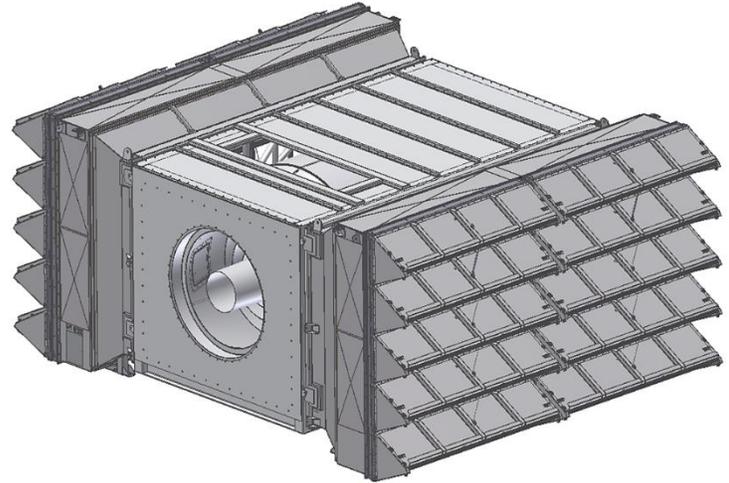

# Protecting Gas Turbines goes beyond just replacing filters! Parker supports your maintenance needs & reduces downtime.

Turbine operators can rely on PARKER Gas Turbine Filtration for the support and service needed to ensure flawless operation & minimal loss of performance.

PARKER, as original Manufacturer, is your best source for spare parts and maintenance support.

### Key Benefits

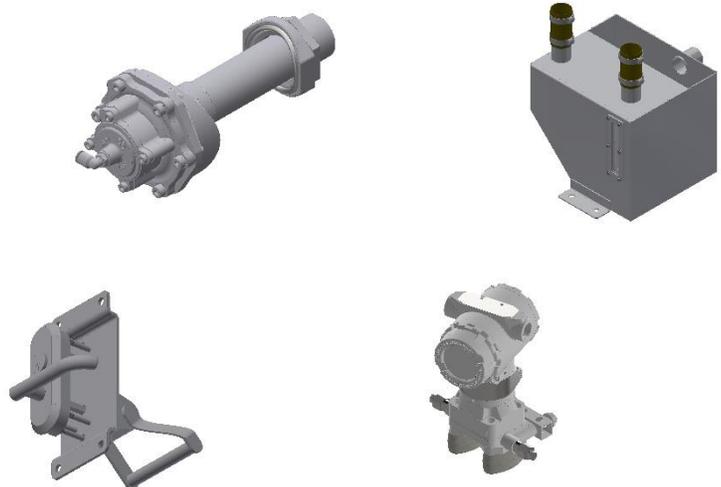

- Maintain turbine performance over the years
- Reduce risk of unscheduled maintenance
- Update obsolete parts
- Extend filtration unit operative life
- Prevent salt, water & contaminants bypass

## OEM Spares to Maintain your intake

### Components

- Filter Clamps & Clips
- Seals, Gaskets & tapes
- Flexible Joints
- Flange Gaskets
- Gauges
- Pulse system spares
- Drain Boxes
- Access ladders
- Pressure switch
- Tripods
- Tube fittings
- Lighting & batteries
- Gas Detector Kits
- Door kits

## Proper filtration unit maintenance for flawless operation

Regular maintenance on filtration units not only requires replacement of filter elements & cleaning of plenum. Over the years several items will suffer operational wear & tear or will degrade over time due to harsh offshore environments.

For example, the drain system is critical to prevent water enter the turbine compressor, improper operation can result in water bypass. Periodic inspection and replacement is needed to protect compressor from water ingestion & corrosion.
