

In Aviation

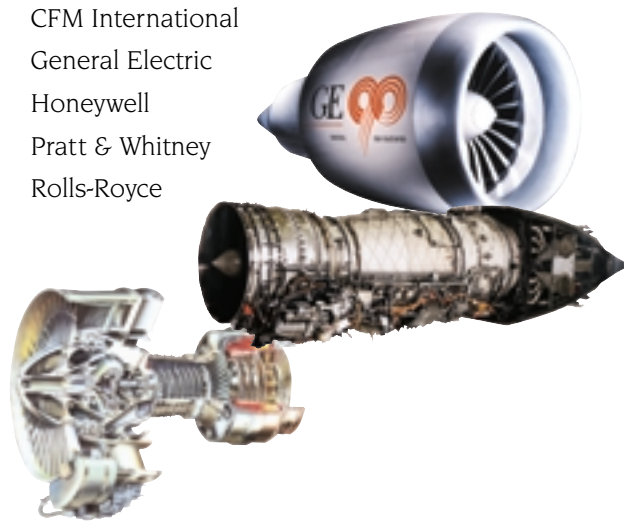

Nozzles with higher performance and lower emissions

What we offer you

- Advanced fluid metering, delivery, and atomization devices and systems
- More than five decades of experience creating fuel injection systems and components for commercial, military, and general aviation
- More fuel nozzles in service on today's newer and larger engines than any other manufacturer
- The proven reliability of billions of logged service hours, with a half billion more hours added every year
- Nozzles that can withstand higher temperatures, while delivering lower emissions
- Advanced low-NO_x and low-CO capabilities
- Quicker response to evolving engine requirements
- Customer-focused partnerships
- The ability to work independently or as an adjunct to customer staff
- The talent, resources, and infrastructure to develop new technologies
