

In Power Generation

Better combustion for cleaner-burning engines

What we offer you

- Aerospace engine experience that translates into higher sustained performance
- Proven leadership in power generation fluid atomization technology
- Innovative nozzle designs resulting in improved fuel flow, atomization, and placement
- Total program support
- Dedicated power generation manufacturing facility
- Lifetime technical, overhaul, and customer support
- Lower installed and life-cycle costs for water injection applications such as turbine inlet air cooling using proprietary Macrospray® Spider and single-point nozzles and manifolds
- The talent, resources, and infrastructure to develop new technologies
- A technology database of proven products and processes for greater flexibility in meeting market demand
- The ability to work directly with customer staff at their facility, cutting development and turnaround time
