

The Complete Piping Solutions Programme

Extend Your business with Complete Piping Solutions

The Complete Piping Solution (CPS) programme provides an opportunity for you to become part of a new global network providing a single source of comprehensive piping services, including:

- **Advice** - expert advice on new piping and connections, system improvement and modernisation, and all aspects of lines, seals and materials
- **Prefabrication** - pipe bending, end processing and cleaning
- **Design** - pipe layout, dimensioning, measurement, drawings and documentation
- **Delivery** - assembly/dispatch and documentation
- **Assembly** - on-site assembly, testing and flushing

More than 10 reasons, why You will benefit from the new CPS Centres:

- Competent and comprehensive weld-free solutions for all piping applications including hydraulic
- Expert advice – from design and pre-configuring to delivery and installation – all using the best quality products to ensure maximum reliability
- Customised solutions tailored to their specific requirements to deliver optimum efficiency
- A single source of comprehensive and high-quality piping services
- The best quality parts and best solutions to ensure system optimisation
- Fast, local response
- Improved compliance
- Taking pressure off their own teams and providing reassurance
- Safer and more environmentally friendly technology
- Full integration with and into existing systems
- Saving time and money by lowering installation, maintenance and testing costs, increasing productivity and reducing down times

Further reassurance for Your customers is provided by knowing that the connections of Parker's Parflange F37 system comply with the following standards:

- ISO 6162-1
- SAE J518, 3000 psi interface (Code 61)
- ISO 6162-2
- 6000 psi interface (Code 62) standards
- ISO 6164 flange pattern
