

NEW DISPLACEMENTS WITH EQUAL FLOW! - 45/45CC & 57/57CC

F2

The F2 twin flow truck pump – the easy way to flexible power and improved fuel economy.

The twin-flow pump makes it possible to operate two work functions that are independent of each other which leads to higher speed and an increased operating precision. Another requirement can be a large and a small flow, or two equal flows. All of these alternatives are possible with the twin-flow pump.

With a suitable build-up of the hydraulic system, the main advantage with a twin-flow pump is that three different flows can be provided at the same engine speed.

Features and benefits Series F2:

- Less energy consumption
- Reduced risk of system overheating
- Lower weight
- Easier installation
- Standardised system solutions
- Compact and easy to install

F4

Features and benefits Series F4:

- Totally disengaged when not needed
- Save hundreds of litres on fuel
- Significant reduction of CO² emissions
- Safe limp-home in case of equipment failure
- Just push a button to activate on the go
- Thoroughly tested Parker technology
- Reduces wear on your pump and your transmission
- Compact and easy to install
