

# CONFIGURED ePUMPS

## Electro-Hydraulic Pumps

- Highly reliable components (inverters, motors, and pumps that are perfectly matched without the need for extra adaptors) providing greater assurance
- A wide range of motor/pump combinations adaptative to every battery pack providing greater flexibility
- Reduced energy consumption and emissions through flow on demand
- Longer runtime due to higher, overall efficiency
- Simplified sourcing with a multi-technology Parker solution
- Reduced noise pollution
