# FR1000 Series

UHP Single Stage, Pressure Reducing Regulator

## Consistent, Long Life Performance

The FR1000 Series ultra high purity, non-tied diaphragm, pressure reducing regulator provides precise control of process gas resulting in a stable flow and pressure supply to downstream systems making it an excellent choice for valve manifold boxes, gas cabinets, and many other point of use semiconductor manufacturing applications.

The standard Hastelloy C-22® diaphragm and integrated filtration promotes long life performance while the metal-to-metal diaphragm seal assures high leak integrity.
