Hose Assemblies Are Easy With the Parkrimp System.

Since its introduction in 1980, the Parkrimp family of crimping machines has led the industry in ease of use and rugged durability.

When it comes to hose assemblies, no one puts it all together like Parker. From high-volume productivity to portable on-site assembly, we offer a variety of crimping machines, No-Skive hoses, and No-Skive fittings to meet your needs.

With Parkrimp equipment, anyone can make factory-quality hose assemblies quickly, easily, and cost-effectively. Parkrimp machines are simple to operate and they’re built to provide years of dependable service. Seven Parkrimp models – an entire family of crimpers – are available to meet your bench-mounted or portable needs, crimping straight or bent-stem fittings from 1/4” to 2” in diameter. Just use our No-Skive hoses and fittings to create leak-free hose assemblies whenever and wherever you need them.

The complete system from one source: No-Skive hose, No-Skive fittings, and crimping machines with worldwide availability and service.

Be sure to check www.parker.com/crimpsource for the most up to date information and crimp specifications.
Selecting the right die.

Once the proper Parker Hose and Fitting is selected that meets your application requirements, you will need to select the proper die to assemble them together.

Based on the hose size and approved fitting, select the proper color coded die, as called out in the chart below.

Karrykrimp

**Features**
- Portable, compact rugged design
- Numerous power unit options available
- Pivoting pusher design for easy die change out
- For use with 25, 26, 43, 81, and HY Series fittings

**Specifications**
- Dimensions: 15” wide, 12” deep, 27” high
- Weight: 54 lbs (without power unit)
- Rating: 30 ton force @ 10,000 psi maximum
- Full Cycle Time: 30 seconds with electric pump
- Reference page C-18 for information on available power units

Parkrimp 1

**Features**
- Compact bench mount design
- Engineered for optimal durability
- All in one crimper and power unit design
- For use with 25, 26, 43, 81, and HY Series fittings

**Specifications**
- Dimensions: 26” wide, 20” deep, 25” high
- Weight: 275 lbs (with power unit)
- Rating: 30 ton force @ 3,000 psi maximum
- Full Cycle Time: 20 seconds
- Hydraulic Fluid: AW32 oil
- **Note:** Includes a 115/230 volt, 1 phase, 60 hertz power unit wired for 115V. This unit comes with a 20 AMP male plug and must be run on a dedicated 20 AMP circuit.

Parker Hannifin Corp. Hose Products Division 30240 Lakeland Blvd. Wickliffe, Ohio 44092

Caution: Read the operations and technical manual before attempting to operate this machinery. Do not operate this machine without guard in place. Keep hands clear of moving parts when operating machine.

NOTE: Do not use these machines to assemble 341-20, 451TC-20, 451ST-20 or any size stainless steel fittings.

For a new decal, contact Parker at: 1-800-C-PARKER.
Karrykrimp 2

Features
- Portable, compact rugged design
- Numerous power unit options available
- Crimps both steel and stainless steel fittings
- For use with 25, 26, 43, 70, 71, 73, 78, 81, and HY Series fittings

Specifications
- Dimensions: 14” wide, 15” deep, 30” high
- Weight: 100 lbs (without power unit)
- Rating: 60 ton force @ 10,000 psi maximum
- Full Cycle Time: 20 seconds with electric pump
- Reference page C-18 for information on available power units

Optional Tooling
- Die Kit (85C-KDA) Includes 43 Series dies in sizes 1/4”, 3/8”, 1/2”, 3/4”, 1” and 1-1/4” and 70/71 Series dies in sizes 3/8”, 1/2”, 3/4”, 1”, 1-1/4” ONLY.

DE30

Description
The DE crimpers simplify the gauging aspects of crimping and the pusher retraction stop reduces cycle-time, enabling users to make hydraulic hose assemblies faster.

Strong, lightweight top and bottom plates, one-piece handle and base design and a new micrometer gauging mechanism are features that make the DE30 ideal for portable hose assembly. The DE30's four strain rods reinforce precision and durability while color-coded die sets make finding the right one easy. The crimper is easily customized with a choice of operational pumps, dies and a storage box.

Features
- Supersedes EC30 and K-16 crimpers
- 30 ton cylinder
- Four strain rods for greater durability and crimping precision
- New micrometer gauging mechanism for greater accuracy and reliability
- Improved one piece handle and base design for easier field and vehicle installation
- Strong and lightweight base plate and top plate for improved portability
- Color coded die rings make selection easy
- Detachable pusher and pusher plate

Capability
- Crimps through 1” ID 2-wire braid hose and 4-spiral wire hose with EN00-021 Die set kit and pusher

Power Source(s)
- Hand Pump (EC30-22, optional)
- Air hydraulic pump (EC30-23, optional)
- Electric hydraulic pump (P-116-10), ½ HP, 115 VAC, 60Hz

Dimensions
- 12.75” wide x 19” deep x 20” high

Weight
- 48 pounds (less pump and die sets)

Options
- Pump
  - Hand pump
  - Air powered hydraulic pump
  - Two-stage electric pump – ½ HP 115 VAC 60Hz
- Dies
  - Color coded split ring die sets
  - Color coded solid die ring set
  - Notched bent tube pusher plate
  - Die storage box
  - Quick disconnect fitting for pump hose
DE100

Description
The DE100 brings “do-all” power to users. Capable of crimping 2” SAE100R13 hose using standard die set included with the machine, this is a cost effective crimper available to hose assemblers today. Standard features include a coupling stop, pusher retraction stop, eleven standard color-coded die sets and a built-in pump with foot pedal.

Features
• Supersedes WB60, K-24 and K-601 crimpers
• 100-ton cylinder. Four strain rods for greater durability and crimping precision
• New micrometer gauging mechanism with limit switch for greater accuracy and reliability
• New simplified controller design with emergency stop and circuit breaker integrated with “on/off” power switch for added safety
• New pusher retraction stop for reduced cycle-time of same-assembly crimping
• New coupling stop attaches to standard pusher plate to ease locating couplings in die sets
• Color coded die rings make die selection easy
• Die storage shelving, detachable pusher, large pusher plate, standard pusher plate, notched bent tube pusher plate and small die cone base insert are included
• 10,000 psi two-stage electric pump with foot pedal included

Capability
• Crimps through 2” 2-wire braid hose with standard die sets
• Crimps through 2” 4-spiral wire hose with standard die sets
• Crimps through 2” 6-spiral wire hose with standard die sets

Power Source(s)
• 3 hp 220VAC 60hz, or 50hz single phase

Dimensions
• 41” wide x 30” deep x 35” high

Weight
• 500 lbs. (approximae with standard die sets, pump and shelving)

Options
(purchased separately)
• Additional color coded split die ring sets
• Color coded solid die ring sets
• KDB die sets
Description
The TH8-D206 is a single-phase, 80-ton, bench mounted crimper. Available in 115 volt, the TH8-D206 replaces Parker’s previous crimper model DE60 and, in most cases, can replace the DE100.

Features
• Available in 115 volt, single-phase with standard 50/60 Hz motor
• 80 ton crimper with crimping capabilities greater than the DE60
• Capabilities include up to
  ▪ 1 ½” six-spiral
  ▪ 2” four-spiral
  ▪ Stainless steel fittings
• Tooling and crimp settings are the same as DE60 / DE100. Tooling is ordered separately.
• Adapter bowls made for the use of existing DE60 / DE100 dies
CRIMPSOURCE

Description

The industry’s most complete resource for crimper technical information. It contains all of the crimper specifications approved for Parker's rubber, industrial and thermoplastic hose:

- Crimp specs
- PDFs of technical manuals for easy downloading
- Parts lists
- Troubleshooting advice
- PDFs of crimper decals

Crimpsource provides easy access to all the specifications necessary to correctly fabricate a factory quality hose assembly.

A series of dropdown menus enables users to find what they need quickly and easily.

Choose your crimper, and then select the hose, fittings and current specifications needed to make hose assemblies.

You can also print a simple-to-follow data specification sheet or crimper decal.
Mark the hose insertion depth and push hose into fitting until the mark on the hose is even with the end of the shell. Lubricate hose if necessary, however, DO NOT lubricate if using spiral hose. See Hose Insertion Depth table below.

For 81 Series Shells with 88 Series Fittings

Place shell onto end of hose and make sure the end of the shell lines up with the Insertion Depth mark. Push hose onto the 88 Series fitting until the shell bottoms against the fitting’s stop ring or hex. Lubricate hose if necessary.

Mark insertion depth and push on fitting

Place correct die ring on top of the dies. See decal on crimper for proper die ring.

Insert unitized die train

Position the fitting

Position pusher by replacing the pin and operate pump until the die ring bottoms out. Release pressure within the pump — remove finished assembly.

Crimping using Minikrimp, Karrykrimp, Parkrimp 1, Karrykrimp 2 and PHastkrimp

Position the hose and fitting in dies from below.

Rest bottom of coupling on die step using the PARKALIGN® feature.

Place die ring and crimp

Measure crimp diameter on the flat surfaces of the crimped shell, referenced in the illustration to the left. Reference decal on crimper for crimp diameters. Never use hose assemblies with incorrect crimp diameters.

Important: Hose assemblies must be inspected for cleanliness and free of all foreign particles.

Measure crimp diameter

Hose Insertion Depths

For specific information on crimping, visit Crimpsource™ online at www.parker.com/crimpsource.
Crimping using Superkrimp and Parkrimp 2

**Parkrimp Fittings Series 25, 26, 43, 70, 71, 73, 76, 78, S6, 81, HY**

1. **Mark insertion depth and push on fitting**
   - Mark the hose insertion depth and push hose into fitting until the mark on the hose is even with the end of the shell. Lubricate hose if necessary, however, DO NOT lubricate if using spiral hose. See Hose Insertion Depth table on previous page.
   - For 81 Series Shells with 88 Series Fittings
   - Place 81 Series Shell onto end of hose and make sure the end of the shell lines up with the Insertion Depth mark.
   - Push hose onto the 88 Series fitting until the shell bottoms against the fitting’s stop ring or hex. Lubricate hose if necessary.

2a. **If using large two-piece dies**
   - Insert the proper die set into the die bowl. (The die sets are in two halves of four dies each. Place one half in the back and one half in the front to accommodate bent tube fittings.) Reference decal on crimper for proper tool selection.

2b. **If using small unitized dies**
   - With the pusher in the full up position, lift the back half of the split die ring. Lock it in the up position by pushing the slide pin in. (The slide pin is located inside the pusher at the back.)
   - Lubricate die bowl using a premium quality lithium-base grease. Carefully insert the adapter bowl, 83C-OCB, into the base bowl. The adapter bowl must be tilted toward the back of the crimper during insertion.
   - Lubricate die bowl using a premium quality lithium-base grease. Place unitized die-train into the adapter bowl. Select die and die ring by hose size and type. See decal on crimper for proper die set.
   - Note: Die sets have color-coded cavities indicating size and have the fitting series and dash size stamped on the top.

3. **Place spacer ring**
   - If required, place spacer ring on locating step of adapter bowl. Reference decal on crimper for tool selection.

4. **Position the split die ring**
   - Lower the back half of the split die ring onto the dies by pulling the slide pin forward.
   - Insert the front half of the split die ring aligning the pins in the back half with the hole in the front half.

5. **Position the fitting**
   - Measure crimp diameter
   - Measure crimp diameter on the flat surfaces of the crimped shell, referenced in the illustration to the right. Reference decal on crimper for crimp diameters. Never use hose assemblies with incorrect crimp diameters.

6. **Crimp hose**
   - Turn on the pump by pressing the “ON” switch. Pull the valve handle forward to bring the pusher down for crimping. When the split die ring contacts the base plate, the crimp is complete. Push the valve handle back to lift the pusher, open the dies, and release the finished assembly.
   - Note: You do not have to remove any tooling to insert or remove straight fittings. The front half of the split die ring and the front die train must be removed to insert and remove bent tube fittings.
   - Position the hose and fitting in dies from below: Rest bottom of coupling on die step using the PARKALIGN® feature.

7. **Measure crimp diameter**
   - Important: Hose assemblies must be inspected for cleanliness and free of all foreign particles.

---

---

---
Assembling Twin Tough Rubber Hose

Required Equipment:
Twin Tough hose, fittings, knife, tape measure, heat shrink sleeve, scissors, grease pencil, heat gun, and calipers.

Set-up:
Position the bonded rubber hose so that it lies flat on a work surface without tendency to twist or turn.

Measure hose tear back length: Measure and mark the length that the hoses are to be separated. A minimum of 12 inches is required for crimping the hose ends. A 24 inch tear back is recommended for use with hydraulic tools.

Note: If length of separation/tear back is specified from the threaded or swivel nut end of the coupling, then deduct the cut off allowance dimension for the specific style of coupling used. The cutoff allowance can be obtained from the hose fitting tables in the 4400 Catalog “B” dimension, or can be calculated by subtracting the insertion depth of the shell from the overall coupling length.

Cut hose tear back to length:
Press the bonded hose assembly firmly and flat against the work surface with your free hand so that it does not move.

A.) Using a sharp blade, pierce the center of the valley (web) formed by the hoses.
B.) To start the cut, place the blade in the center of that valley (web) drawing the knife with constant pressure.
C.) Once you have a 1 to 2 inch starter cut, firmly pull each hose end apart to your required separation length.

Note: It is important that the knife blade be perpendicular to the hose during this procedure so the blade cuts only the centerline of the valley (web). EXTREME CARE MUST BE TAKEN TO AVOID CUTTING THROUGH THE COVER OF THE HOSES AND THEREBY EXPOSING THE HOSE REINFORCEMENT. If this occurs, the hose assembly must be discarded.
Measure Separation: It is suggested that the separation length be at least 12 inches, so the crimping operation can be accomplished without risk of kinking the hoses.

Stopping Separation: Parker recommends installing a heat shrink sleeve of at least 2 inches in length with the appropriate I.D. (Table 1) at the termination of the separated hose to provide protection against tearing of the valley (web) or hose covers. This heat shrink sleeve should be placed on the hose assembly prior to the crimping of the hose fittings. Once you have your heat shrink sleeve in place, use a heat gun to shrink the sleeve in place.

Note: EXTREME CARE MUST BE TAKEN TO AVOID EXPOSING THE HOSE ASSEMBLY TO THE DIRECT HIGH TEMPERATURES OF THE HEAT GUN WHILE INSTALLING THE HEAT SHRINK SLEEVE. LONG EXPOSURE FROM A HEAT GUN MAY ADVERSELY AFFECT THE HOSE INNERTUBE OR ITS COVER.

Crimping Fittings: All of your crimping information can be found on Crimpsource (www.parker.com/crimpsource).

First, place your fittings onto each hose end making sure that both have been installed to the correct hose insertion depth. Choose the correct die and die ring. Place half of your hose assembly through the bottom of your Parkrimp crimper. Rest the bottom of the fitting on the die step using the Parkalign system. While lightly holding the hose assembly, operate your crimper pump so that the pusher on the crimper comes down in contact with the die ring until it bottoms out on the crimper base. Then release the pressure within the pump and remove the first half of your finished assembly. Always measure your hose assemblies for the correct crimp diameter. Now, repeat the crimping process on the other fitting.

Note: EXTREME CARE MUST BE TAKEN TO AVOID KINKING THE HOSE THAT IS NOT BEING CRIMPED DURING THIS PROCESS.
### Hand Pump
**Part No. 82C-0HP**
*(for use with the Minikrimp, Karrykrimp and Karrykrimp 2)*
Ease of operation hand pump delivers 10,000 psi
- Length: 23”
- Width: 4”
- Height: 5”
- Port Size: 3/8” NPTF
- Weight: 9 lbs
- Hydraulic Fluid: Enerpac oil

### Hand Pump
**Part No. 85C-0HP**
*(for use with the Minikrimp, Karrykrimp and Karrykrimp 2)*
Ease of operation hand pump delivers 10,000 psi
- Length: 29”
- Width: 13”
- Height: 11”
- Port Size: 3/8” NPTF
- Weight: 61 lbs
- Hydraulic Fluid: Enerpac oil

### Electric Pump
**Part No. 82C-0EP**
*(for use with the Minikrimp, Karrykrimp and Karrykrimp 2)*
Ease of operation hand pump delivers 10,000 psi
- Length: 13”
- Width: 13”
- Height: 15”
- Port Size: 3/8” NPTF
- Weight: 31 lbs
- Hydraulic Fluid: Enerpac oil
- 115 volt, 1 phase, 50/60 Hz, 9 amp

### Electric Pump
**Part No. 85C-0EP**
*(for use with the Minikrimp, Karrykrimp and Karrykrimp 2)*
Heavy duty electric pump delivers 10,000 psi at a faster cycle time
- Length: 19”
- Width: 11”
- Height: 17”
- Port Size: 3/8” NPTF
- Weight: 59 lbs
- Hydraulic Fluid: Enerpac oil
- 115 volt, 1 phase, 50/60 Hz, 20 amp

### Air/Hydraulic Pump
**Part No. 82C-0AP**
*(for use with the Minikrimp, Karrykrimp and Karrykrimp 2)*
Lightweight pump operates with 80-150 psi shop air pressure and delivers 10,000 psi
- Length: 15”
- Width: 6”
- Height: 6”
- Intake Port Size: 1/4” NPTF
- Output Port Size: 3/8” NPTF
- Weight: 14 lbs
- Hydraulic Fluid: Enerpac oil

### Vehicle Battery-Powered Pump
**Part No. 85C-12V**
*(for use with the Minikrimp, Karrykrimp and Karrykrimp 2)*
Ideal unit for Parker Mobile Hose Preplacement Service, Delivering 10,000 psi.
- Length: 12”
- Width: 8”
- Height: 19.5”
- Weight: 67 lbs
- Hydraulic Fluid: ISO-46

---

**Enerpac Warranty Statement**
Enerpac products are warranted to be free of defects in materials and workmanship. Any product that does not conform to specification will be repaired or replaced at Enerpac’s expense, anywhere in the world; simple as that! This warranty does not cover ordinary wear and tear, abuse, misuse, alterations, or the use of improper fluids. Determination of the authenticity of a warranty claim will be made only by Enerpac or its Authorized Service Centers.
Hydraulic Press Kit
Part No. 8PC-001
For use with 26, 43, 81 and HY Series Fitting ONLY

Specifications
• Required Height from Press Base to Press Ram: 10 inches
• Required Width of Bowl Diameter: 5 inches
• Bowl Rating: 30 tons force maximum
• Minimum Required Press Capacity: Hose Size 1/4" to 1/2" needs a 20 ton press
  Hose size 5/8" to 1-1/4" needs a 30 ton press

Notes:
• For additional information and operating instructions, visit the Parker Hose Products Division website at www.parkerhose.com.
• For crimping instructions, see pages C-14 and C-15.
• Hose assemblies must be inspected for cleanliness and free of all foreign particles.
Hose Cut-Off Machine
Part No. 332T-115V

Features
• For quick, easy cutting of spiral reinforced hose up to 1-1/4” I.D.
• Moving parts shielded by guards

Specifications
• Dimensions: 13” wide x 26” long x 22” high
• Shipping Weight: 71 lbs.

Standard Equipment

Optional Equipment
• Smooth Cutting Blade (580661)

Hose Cut-Off Machine
Part No. 631075

Features
• Portable saw for cutting on the job
• Unique clamp system spreads hose as it cuts to prevent blade binding
• Cuts multi-braided wire reinforced hose including 4 spiral construction up to 1-1/4” I.D.

Specifications
• Dimensions: 16” wide x 12” long x 19” high
• Shipping Weight: 58 lbs.

Hose Cut-Off Machine
Part No. 239 and 339

Features
• Designed for heavy duty use
• Cuts multi-braided wire reinforced hose including 6 spiral construction up to 2” I.D.

Specifications
• Dimensions: 22” wide x 42” long x 24” high
• Shipping Weight: 115 lbs.

Standard Equipment

Hose Cut-Off Machine - Karrykut
Part No. TH3-50

Features
• Standard 14” scalloped blade
• Front plate with useable pins easily holds in place for a straight cut
• Clear face shield

Specifications
• 4.2 HP/115 volts 20 amp 1PH 50/60 cycle motor (a 20 amp dedicated circuit is recommended)
• Dimensions - 22-1/2” wide x 18-1/4” long x 23-1/2” high
• Shipping weight - 65 lbs.
• Blade size - 14” x 0.125” x 1”

Saw Part Number: TH3-50
• Optional Equipment:
  • Scalloped Cutting Blade (TH3-50-1)
  • Smooth Bevel Cutting Blade (TH3-50-2)
Push-Lok Cut-Off & Assembly Tool
Part No. 881540

Features
• Combined hose cutter and toggle action press that cuts and assembles Parker Push-Lok in sizes 1/4" through 3/4" I.D.

Specifications
• Dimensions: 16” long
• Shipping Weight: 4 lbs.

Hose Cut-Off Tool
Part No. 316

Features
• Small in size and easy to use
• Quick cutting of textile reinforced hose
• Ruggedly built for years of trouble-free service

Specifications
• Dimensions: 15” long
• Shipping Weight: 6 lbs.

Hose Cut-Off Tool
Part No. TH11-1

Features
• Designed for quick, easy cutting of textile reinforced hose.
• Squarely cuts Push-Lok hose in sizes 1/4" through 3/4" I.D.

Specifications
• Dimensions: 8” long
• Shipping Weight: 0.3 lbs.

Hose Cut-Off Tool - Handykut
Part No. 871522

Features
• Portable tool for efficient cutting of hose
• Can be positioned onto a flat surface by clamps or by locking it in a vise, properly align the hose in a radius and cut it with a hacksaw

Specifications
• Dimensions: 6” wide x 18” long x 6” high
• Shipping Weight: 10 lbs.
Hose Insertion Depth Blocks
Part No. TH9-1-XXX

Features
• For quick easy marking of hose insertion depth
• Ensures accuracy and increased productivity

Available Blocks

Hozembrler
Part No. 432-115V

Features
• Power machine to facilitate the attachment of field attachable fittings
• Handles all hose and fittings up to 4 spiral wire, in sizes 3/16" through 2" I.D., including bent tube elbows
• Comes with vise, all adapters, foot switch and safety guard with 115V, 30 amp, universal AC motor

Specifications
• Shipping Weight: 141 lbs.

Optional Parts
• Mounting stand (662451)

Fitting Push-On Stand
Part No. TH2-7

Features
• Quickly and easily pushes fittings onto hose
• Boosts productivity and quality
• Eliminates the need of rubber mallets and oils to get fittings onto the end of the hose for crimping
• Standard with straight tooling required for sizes 1/4" through 2" for all crimped fittings, 82 Series Push-Lok and 88 Series field attachable fittings

Specifications
• Shipping Weight: 200 lbs.

Optional Tooling
• Elbow Pusher Set (TH2-7-ELS)

Die Storage Racks
Part No. 80C-0DR and 83C-0DR

Features
• Modular die rack designed to hold small and large Parkrimp dies
• Can be bolted together to a work bench horizontally or vertically

Standard Equipment

<table>
<thead>
<tr>
<th>Part Number</th>
<th>Description</th>
</tr>
</thead>
<tbody>

Swivel Die Rack
Part No. 80C-SDR-XXXX

Features
• Holds up to 30 Parkrimp dies of any size
• Powder-coated, heavy-duty steel construction
• Consists of a base unit and up to five circular holders
• Floor or bench mounted

Standard Equipment

Hose Perforator
Part No. 601069

Features
• Small hand tool to prick minute holes in the rubber cover
• To be used in gaseous applications where the pressure exceeds 250 psi
• Driven into the cover every few inches of length either striking the hose or by a rolling action over the hose cover
• Not generally necessary to perforate the hose on all sides

Specifications
• Shipping Weight: 2 lbs.

Hose Oil
Part No. Hose Oil

Features
• Reduces torque and eliminates waste lubrication
• Use hose oil with the recommended hose assembly instructions

Accrolube
Part No. Accrolube

Features
• High efficiency lubricant used for stainless steel field attachable fittings
• Contains Teflon to reduce the wear between metal surfaces, protects against corrosion and ultimately eliminates galling
Mandrels - 25 Series
(For 271 Transportation Hose)
Part No. TH2-7M25-6 and TH2-7M25-8
