

HCS Brief

Hydraulic Cartridge Systems

Tech Brief TB-0020

GM025XX to DMH085XX Cross Reference

Parker HCS Division is committed to provide the most reliable and current product for our customers. To assist us in accomplishing this, Parker HCS is rationalizing old legacy product into current catalog offerings. Once Parker HCS has identified a product family for rationalizing, we will produce a Technical Brief to assist our customers with crossing over to the current product family offering that is in our current catalog.

One of the first cartridge valve families to be rationalized for obsolescence, is the GM025XX family of Manual Valves. This family of valves is a legacy product line from our Sterling Hydraulics acquisition in 2005. Parker HCS currently offers the DMH085XX family that is a functional replacement for this legacy product.

The table below is provided to assist all our customers and users of the GM025XX family of valves with converting to the DMH085XX family. If further assistance is needed, please contact HCS Technical Support at 847-955-5000 or via email HCSTechnical@parker.com and our Technical Support team will be happy to assist you.

Legacy:	Crosses to:	Comments/differences:
GM0251	DMH085C1	DMH085 about 1.3" taller
GM0253	DMH085C4	DMH085 about 1.3" taller
GM0257	DMH085C9	DMH085 about 1.3" taller
GM0259	DMH085C2	DMH085 about 1.3" taller

More Information

Parker bodies are available from the Hydraulic Cartridge Systems Division. Consult your HCS catalog or www.parker.com/hcs for more information. You can also contact a Product Manager or Technical Support Specialist for help at 847-955-5000 or HCSTechnical@parker.com.
