

Eco Moisture Separator

Air Intake Filter

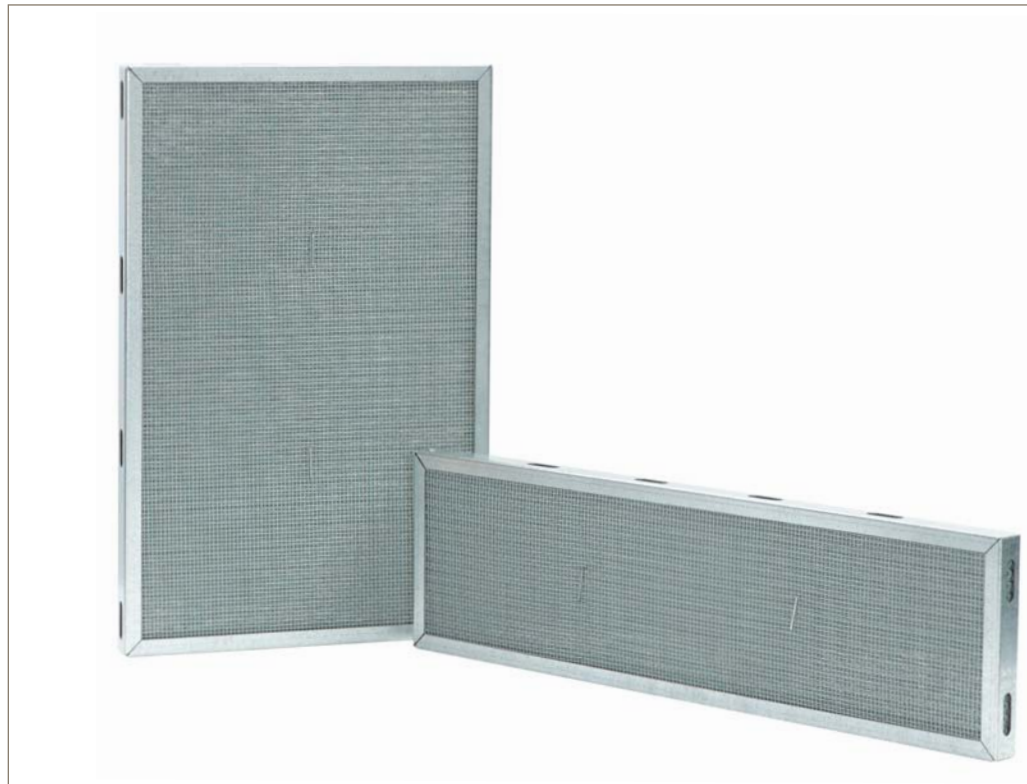

Customer Value Proposition:

PARKER ECO MOISTURE SEPARATORS are highly effective in significantly reducing oil mist, water mist, fog or droplets from airstream.

CONSTRUCTION – The 2” deep media pack is encased in a 4” deep, 16-gauge galvanized or stainless steel enclosing frame and is comprised of multiple, alternate layers of flat and crimped, galvanized screen.

PERFORMANCE – The separator is 98% efficient on 20 micron droplet size at 500 fpm. Velocity should not exceed 550 fpm or go below 450 fpm without consulting factory.

Installation

The ECO Moisture Separator must be vertically installed in order to operate at peak efficiency. A “TOP” marker is provided for proper orientation during installation. Mounting hardware must be designed to support the moisture separator with adequate drainage.

Features

- Cleanable
- All metal
- Galvanized
- Stainless
- Special plating
