

# Parker Hydraulic Pump Division

## “Keep it REAL” Program Benefits

Customers worldwide trust Parker’s hydraulic products for exceptional performance, lasting dependability and superior value. But when a repair or rebuild eventually is needed, insisting on genuine Parker Hydraulic Pump Division OEM Aftermarket Parts carries many valuable cost advantages. We established the **“Keep it REAL”** program to deliver all of them automatically when you specify **“REAL Parker.”**

ENGINEERING YOUR SUCCESS.

### **“Gray” Versus REAL**

When market parts from unknown and unproven manufacturers are used, there is no assurance that a product will perform as originally designed and manufactured. Only genuine Parker parts used by an authorized repair center assure that our product will be repaired to the exact original configuration, perform the same as when brand new and carry our original warranty. That’s just the beginning of Parker’s “**Keep it REAL**” benefits.

### **Program Advantages**

- **Same original Parker factory warranty extended to the REAL repaired/rebuilt product**
- **Assurance of latest design and materials in replacement parts**
- **Replacement parts built on same Parker lines as new product parts**
- **Quickly accessible authorized repair centers located conveniently worldwide**
- **Shortened delivery times, strategic pricing, current parts/kits catalogs**

### **“Keep it REAL” translates to**

Recognize. Engineered. Authentic. Leader. It’s hard to get more REAL than that.

### **Look to the Leader**

No other name in the industry matches Parker’s commitment to MROs both domestically and globally. Our exclusive “**Keep it REAL**” program is continuing proof. For the assurance you deserve, contact your nearest authorized Parker repair center or Parker representative.
