Hydraulic Global Overview
Products and Systems for Mobile, Industrial and Truck
Parker’s Global Markets

Parker Hydraulics has a leadership position in major mobile, industrial and truck markets throughout the world. Based on a partnering philosophy, Parker provides not only leading edge motion and control technology, but is deeply committed to improving productivity and throughput while reducing energy and fuel consumption.

Mobile
Parker continues to dominate the mobile market with innovative products, sub-assemblies and systems. Parker’s knowledgeable motion and control experts help vehicle design teams develop and refine functional subsystems or complete-vehicle motion control systems. These solutions include implement control, cooling, steering, braking, suspension, drive and propel and intelligent, computer-based mobile systems. Many Parker components are ISO certified and all are manufactured to the highest standards.

Industrial
Parker’s industrial hydraulics capabilities cover a wide range of applications from machine tool, rubber and plastics and in-plant automotive to the ever changing and demanding medical and energy markets. Parker’s industrial engineering and manufacturing expertise is what sets it apart from others. Parker continues to look for ways to increase customer’s profitability by providing components and systems that are smaller, lighter, and last longer. Additionally, Parker is dedicated to improving the work environment with products that are quieter, run longer and produce less heat while reducing overall machine energy costs.

Truck
Today’s global truck market is as tough as ever. Increased pressures from regulators to improve fuel efficiency and reduce emissions has necessitated that manufactures look for design and manufacturing partners who have the engineering expertise and breadth of products to meet the challenges head-on. Parker works with both OEMs and trailer and body builders to see that not only are regulations met, but that trucks stay on the road and continue to be productive and profitable. One of the best commitments to the truck market is Parker’s fan drive system that is quieter, much more efficient and greatly improves fuel economy.
Training Excellence
Parker’s technical training for hydraulic, pneumatic, and electromechanical technology is the best in the world. We offer complete and comprehensive texts, web-based training, and hands-on classes for employees, distributors, and customers. Classes are held at your facilities or at Parker.

Hundreds of colleges and universities use Parker textbooks in motion and control courses. In addition to texts, Parker provides these institutions instructor guides, computer-based training discs, digital overheads on CD, final exams, drafting and simulation software, lab manuals, and trainer stands.

Find out more about Parker training by visiting: www.parker.com/training

Parker is your global hydraulics partner when it comes to increased productivity and profitability. No matter what your needs, Parker is your single source provider of all your hydraulics motion and control solutions.

Parker – Engineering your Success.

Hydraulic Distribution and Channel Partners

Parker’s ultimate competitive advantage in serving customers has been built with a global network of 12,000 distributors that can provide Parker products and services nearly anywhere, anytime. Many Parker distributors offer a one-stop shop for a wide range of products, engineering services, computer-aided design, fabrication, and assembly. Parker distributors can assist with equipment design, prototyping, and the integration of electronic or pneumatic components with hydraulic systems.

Parker’s distributors are chosen because of their commitment to providing exceptional customer service and complete hydraulic systems solutions and carry local inventory of Parker products, ensuring customers fast delivery and reduced downtime.

Locate your nearest Parker distributor by visiting our web site at www.parker.com/distloc

Support and Service
When it comes to hydraulics, Parker’s worldwide network of field-sales engineers walk the walk and talk the talk. The best trained in the business, our field-sales engineers can be your single point of contact for any hydraulic requirement, including rapid problem solving. All are degreed engineers who are dedicated to long-term relationships. And whether they are crawling inside your machine during business hours, or working weekends, Parker engineers are there when you need them!
Wind Power Systems

Parker hydraulics play a critical role in the operation of wind turbines, as they harvest kinetic energy. We supply the hydraulic power necessary to operate pitch, yaw and braking systems while supplying back-up in case of a power failure, to provide a safe stop.

Customer-Driven Solutions

Parker Hydraulics is in the “solutions business,” offering our customers the widest array of solutions and services available. Customers can be assured that no one knows hydraulics like Parker’s staff of highly qualified application and design engineers, innovation teams, and our systems-solutions specialists. Our customers can reduce their number of vendors without compromising product integrity. And buying from a single source saves both time and money while allowing easier ordering and faster deliveries.

Hydraulic Products for Every Application

At the heart of every mobile, industrial and truck hydraulics solution is Parker’s 75-year reputation for innovation and quality manufacturing. No one is better positioned to meet your needs. Parker maintains more than 200,000 hydraulic model numbers in its inventory, so whether you are designing new applications or retrofitting older ones, we can meet any hydraulic component requirement.
Solar Power Generation

A precise, powerful, simple and low maintenance hydraulic motion system is key to efficient energy generation at solar thermal power plants. A single hydraulic actuator rotates each parabolic mirror concentrator in 0.1 degree increments to precisely track the sun.

Application Expertise

Parker believes that it takes more than our great products, competitive prices, and on-time delivery to satisfy customer demands. It takes a commitment to provide exceptional value.

For today’s customer, an outstanding total experience is the benchmark by which many suppliers are evaluated. Parker delivers tangible and measurable benefits that are designed to reduce your total cost while increasing performance and productivity, eliminating your frustrations, and improving your profitability.

Energy Recovery

Parker’s hybrid hydraulic drive systems are designed to recover and store brake energy for later use to generate power. Field test results of our refuse truck systems have yielded improvement in miles per gallon ranging from 45 to 60%.

At Parker, value is not a commodity. Instead, it is the result of personal interaction and resources. Our value-added services include:

- Machine Analysis and Troubleshooting
- Design-Engineering Support
- System Design
- Components Selection
- New Product Development
- Custom-Component Manufacturing
- Assemblies and Kits
- Sub-Systems
- Global Support and Service
- Training
# Extensive Product Offering

When it comes to hydraulic products, Parker is the most recognized name in the business. With over 75 years of experience, Parker currently inventories more than 200,000 hydraulic part numbers, allowing for unlimited solution possibilities. Customers can reduce their number of vendors without compromising quality. And buying from a single source saves time and money, allowing for easier ordering and faster shipping.

## Accumulators

Accumulators maximize the energy efficiency of hydraulic systems by increasing productivity, reducing maintenance and lowering overall operating cost. These systems last longer and provide better performance than comparable systems without accumulators.

- Piston, bladder and diaphragm designs
- Shock suppressors
- Reservoir isolators
- Gas bottles
- Charging kits and accessories

## Compact Hydraulics

Compact, powerful and efficient performance are delivered from Oildyne products. Robust, simple designs provide power density, easy installation and flexibility for use across a wide variety of applications.

- Electro-hydraulic actuators
- Miniature power units
- Fluid power systems
- Gear motors
- Piston pumps
- Cartridge piston pumps
- Hand pumps

## Cylinders

From off-the-shelf mobile or quick-delivery tie rod to highly engineered cylinders for your specific applications, the wide array of hydraulic cylinders from Parker reduce your cost by providing the optimum hydraulic actuator solution.

- Industrial Tie Rod
- Mobile
- Mill Type
- Electrohydraulic
- Telescopic
- Custom

### Extensive Product Offering

**Mobile Electronics**

<table>
<thead>
<tr>
<th>Electronic systems improve diagnostics, ease of operation and functionality. User programmable, Windows-based software reduces programming costs and development time. Several products support multiple languages and custom overlays. Parker systems experts can assist in all phases of implementation.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• System solutions comprising control modules, displays and electromechanical</td>
</tr>
<tr>
<td>• Sensors for speed and direction, rotary positioning, proximity, tip, tilt and linear positioning</td>
</tr>
<tr>
<td>• CAN bus (proprietary, J1939, generic) interface</td>
</tr>
<tr>
<td>• ISO, EN, IEC, EP, SAE certifications and verification testing</td>
</tr>
</tbody>
</table>

**Filtration**

<table>
<thead>
<tr>
<th>Parker’s hydraulic filters deliver positive protection against contamination, providing reliability for your hydraulic systems and components. On-line particle analysis, off-line bottle sampling and water contamination analysis are perfect complements to high performance.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Pressure &amp; return filters</td>
</tr>
<tr>
<td>• Off-line &amp; purification systems</td>
</tr>
<tr>
<td>• Reservoir accessories</td>
</tr>
<tr>
<td>• Fluid condition monitoring</td>
</tr>
<tr>
<td>• Fluid analysis</td>
</tr>
<tr>
<td>• Competitive interchanges</td>
</tr>
</tbody>
</table>

**Fluid Connectors**

<table>
<thead>
<tr>
<th>The leaders in “dry technology” for the fluid power industry, Parker’s Fluid Connectors Group is your single source for Parker’s high-quality tube fittings, hose and hose fittings, thermoplastic tubing, brass fittings and valves, quick-disconnect couplings and assembly tools.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Brass products</td>

Threaded Cartridge Valves & Integrated Hydraulic Circuits

Parker has one of the broadest lines of cartridge valves and manifold systems in the industry. With expert applications engineering assistance, we can develop and design virtually any solution to meet your needs. From simple cartridge valve applications to complex integrated manifold systems, we can handle it all.

- Solenoid valves
- Pressure controls
- Flow controls
- Check and Shuttle valves
- Logic elements
- Load and motor controls
- Proportional control valves
- Integrated manifold solutions

Valves and Controls

Parker provides the largest selection of Mobile and Industrial valve products ranging from simple in-line valves to high performance sectional and manifold mounted directional and proportional valves.

- In-line products including flow and pressure controls, checks, ball and shear seal valves
- Manifold mounted pressure, directional, proportional control and servovalves
- Mobile open-center and pressure-compensated load-sense valves (pre & post comp)
- In-line accessories and hydraulic remote controllers

WARNING - USER RESPONSIBILITY

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.

The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.

To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.
Parker Hannifin Corporation
ENGINEERING YOUR SUCCESS.

A global Fortune 300 company with customers in 48 countries, Parker Hannifin is the world's leading supplier of hydraulic, pneumatic, and electromechanical systems and components. Customers rely on Parker for engineering excellence, world-class manufacturing and outstanding customer service to provide comprehensive application solutions that are second to none.

- More than $12.1 billion in sales
- 298 plants worldwide
- 12,000+ distributors
- 449,000 customers
- Serving 1,200 distinct markets
- Listed as PH on New York Stock Exchange

Let Parker become part of your design team. Whether you need to develop new products, redesign existing applications, or design completely new systems, Parker offers unparalleled engineering expertise.

The Parker Brand
Parker Hannifin is your trusted single source partner for all your motion and control solutions.

Parker’s Motion & Control Technologies

At Parker, we’re guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 1 800 C-Parker (1 800 272 7537).

AEROSPACE
Key Markets
- Aircraft engines
- Business & general aviation
- Commercial transports
- Land-based weapons systems
- Military aircraft
- Missiles & launch vehicles
- Regional transports
- Unmanned aerial vehicles

Key Products
- Flight control systems & components
- Fluid conveyance systems
- Fluid metering delivery & atomization devices
- Fuel systems & components
- Hydraulic systems & components
- Inert nitrogen generating systems
- Pneumatic systems & components
- Valves & actuators

CLIMATE CONTROL
Key Markets
- Agriculture
- Air conditioning
- Food, beverage & dairy
- Life sciences & medical
- Precision cooling
- Process cooling

Key Products
- CO2 controls
- Electronic controllers
- Filter driers
- Hand shut-off valves
- Hose & fittings
- Pressure regulating valves
- Refrigerant distributors
- Safety relief valves
- Solenoid valves
- Thermostatic expansion valves

ELECTROMECHANICAL
Key Markets
- Aerospace
- Conveying & material handling
- Factory automation
- Food & beverage
- Life science & medical
- Machine tools
- Packaging machinery
- Paper machinery
- Plastics machinery & converting
- Primary metals
- Semiconductor & electronics
- Textile
- Wire & cable

Key Products
- AC/DC drives & systems
- Electric actuators
- Controllers
- Gearheads
- Human machine interfaces
- Industrial PCs
- Inverters
- Linear motors, slides & stages
- Precision stages
- Servo motors
- Stepper motors
- Synchronous motors, drives & controls
- Structural extrusions

FILTRATION
Key Markets
- Aerospace
- Chemical processing
- Consumer
- Energy, oil & gas
- Fluid power
- General industrial
- Information technology
- Life sciences
- Military
- Semiconductors
- Telecommunications
- Transportation

Key Products
- Analytical gas generators
- Compressed air & gas filters
- Condition monitoring
- Engine air, fuel & oil filtration & systems
- Hydraulic, lubrication & coolant filters
- Process, chemical, water & microfiltration filters
- Nitrogen, hydrogen & zero air generators

FLUID & GAS HANDLING
Key Markets
- Aerospace
- Agriculture
- Bulk chemical handling
- Construction machinery
- Food & beverage
- Fuel & gas delivery
- Industrial machinery
- Mobile
- Oil & gas
- Transportation
- Welding

Key Products
- Brass fittings & valves
- Diagnostic equipment
- Fluid conveyance systems
- Industrial hose
- PTFE & PFA hose, tubing & plastic fittings
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects

HYDRAULICS
Key Markets
- Aerospace
- Aerial lift
- Agriculture
- Construction machinery
- Forestry
- Industrial machinery
- Mining
- Oil & gas
- Power generation & energy
- Truck hydraulics

Key Products
- Diagnostic equipment
- Hydraulic cylinders & accumulators
- Hydraulic motors & pumps
- Hydraulic systems
- Hydraulic valves & controls
- Power take-offs
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects

PNEUMATICS
Key Markets
- Aerospace
- Conveying & material handling
- Factory automation
- Food & beverage
- Life science & medical
- Machine tools
- Packaging machinery
- Transportation & automotive

Key Products
- Air preparation
- Compact cylinders
- Field bus valve systems
- Grippers
- Guided cylinders
- Manifolds
- Miniature fluidics
- Pneumatic accessories
- Pneumatic actuators & grippers
- Pneumatic valves and controls
- Rodless cylinders
- Rotary actuators
- Tie rod cylinders
- Vacuum generators, cups & sensors

PROCESS CONTROL
Key Markets
- Chemical & refining
- Food, beverage & dairy
- Medical & dental
- Paper machinery
- Packaging machinery
- Transportation & automotive

Key Products
- Analytical sample conditioning products & systems
- Fluoroplastic chemical delivery fittings, valves & pumps
- High purity gas delivery fittings, valves & regulators
- Instrumentation fittings, valves & regulators
- Medium pressure fittings & valves
- Process control manifolds

SEALING & SHIELDING
Key Markets
- Aerospace
- Chemical processing
- Consumer
- Energy, oil & gas
- Fluid power
- General industrial
- Information technology
- Life sciences
- Military
- Semiconductors
- Telecommunications
- Transportation

Key Products
- Dynamic seals
- Elastomeric o-rings
- EMI shielding
- Extruded & precision-cut, fabricated elastomeric seals
- Homogeneous & inserted elastomeric shapes
- High temperature metal seals
- Metal & plastic retained composite seals
- Thermal management
