Water Retract Actuator

Bulletin PCDWRA

ENGINEERING YOUR SUCCESS.

Parker's New WRA250 Water Retract Actuator

The WRA250 **stops weld water** expulsion. The integral design allows for **dry weld tip changes** and keeps water off your equipment, and out of your cell

Made from Parker proven components

- Stainless steel, Aluminum, Composite materials

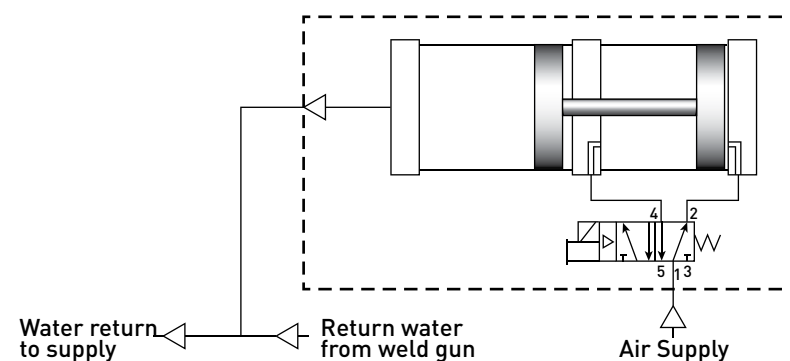

Special Features

- 24VDC electrical control voltage
- Industry standard easy change M12 connector
- Fast installation with single airline

How Does It Work?

1. Turn off water supply to gun
2. Actuate WRA
3. Remove weld tip

WRA250 in use

WRA250 not in use

Water connection available in NPT or BSPP
