WARNING — User Responsibility

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.

The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.

To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

Offer of Sale

The items described in this document are hereby offered for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated in the “Offer of Sale”.

Patent Information

The Chelsea® Power Take-Off or its components shipped with this owner’s manual may be manufactured under one or more of the following U.S. patents:

**221 Series**

Intermittent Torque Rating
Up to 250 lbs-ft [339 Nm]

- Mechanical
- 48 HP [36 Kw] at 1000 RPM
- 30 Lbs. [13.6 kg]

**252 Series**

Intermittent Torque Rating
Up to 120 lbs-ft [163 Nm]

- PowerShift (Hydraulic)
- 23 HP [17 Kw] at 1000 RPM
- 25 Lbs. [11 kg]

**272 Series**

Continuous Torque Rating
Up to 300 lbs-ft [407 Nm]

- PowerShift (Air or Hydraulic)
- 57 HP [43 Kw] at 1000 RPM
- 49 Lbs. [22 kg]
### 290 Series

**Intermittent Torque Rating**
Up to 175 lbs-ft [237 Nm]

- Mechanical
- 33 HP [25 Kw] at 1000 RPM
- 37 Lbs. [16.8 kg]

### 340 Series

**Intermittent Torque Rating**
Up to 200 lbs-ft [271 Nm]

- Mechanical (Reversible)
- 38 HP [28 Kw] at 1000 RPM
- 32 Lbs. [15 kg]

### 442 Series

PTO Application Work Sheet

INFORMATION FROM CUSTOMER:

A. Make and model of transmission.

B. Type of driven equipment.

C. Input horsepower required for driven equipment.

D. Operating speed of driven equipment.

E. Desired engine speed during operation.

-or-

PTO Ratio (if known)

F. From items C and D, determine the torque requirement of the driven equipment using this formula: \( \frac{\text{HP} \times 5252}{\text{RPM}} \) = lbs-ft.

For continuous operation divide by .7
(Torque ÷ .70) to get torque requirement for driven equipment.

G. Direction of driven equipment shaft rotation when equipment is mounted on vehicle.

H. Reverse gear requirements.

Yes____ No____

I. Type and size of PTO output required.
   (i.e. driveshaft, direct mount pump).
USE HY25-3000/US
CHELSEA APPLICATION CATALOG:

Steps to specifying proper PTO:

1. Application page number.

2. Select the proper PTO type (i.e. Mechanical, PowerShift, etc.).

3. Using the Application page number from step 1, find PTOs that meet or exceed the torque requirements of the application.

4. From that list, pick the unit that comes closest to satisfying the rotation and speed percentage for the application.

5. Note the PTO model number and all other kits required on the line to the right.

6. Determine what options are needed and change model number designators to obtain correct options (Shifter, Output, etc.).

CAUTION: It is very important to read all notes at the bottom of the Application Page. The notes contain warnings and/or special parts that need to be considered for that PTO application.

NOTE: Intermittent – Operating less than 5 minutes in a given 15 minute period of time.

Continuous – Operating longer than 5 minutes in a given 15 minute period of time.

Consult Chelsea Application Catalog HY25-3000/US for specific applications.

**NOTE:** Torque rating (above) refers to the minimum “intermittent” PTO torque shown in the catalog.

The information on this sheet is ONLY suggestive and is not intended to be an absolute and comprehensive source for determining the necessary PTO. There is more information required to make an informed decision as to the proper PTO for each application. It is the responsibility of the system designer and/or truck upfitter to determine the proper PTO.

## Troubleshooting

### Noisy PTO

1. **Improper number of gaskets** – Correct as outlined under PTO “Installation.”
2. **Gears worn and pitted** – Replace worn gears. Check application to ensure PTO is properly spec’d for torque requirement.
3. **Bearing worn, due to high loads or chips** – Reduce load – Replace worn and rough bearings and races. Change oil.

### Jumping Out of Gear

1. **Shift rail poppet spring broken** – Replace poppet spring.
2. **Shift rail poppet notch worn** – Replace shift rail.
3. **Shift fork spring or loose on shift rail** – Replace spring fork or tighten set screw in shift fork.
4. **Gear teeth worn** – Replace worn gears.
5. **Gears not shifted fully in mesh** – Check shift linkage for proper adjustments.
6. **Shift linkage too short** – Adjust linkage to permit full shift.

### PowerShift PTO Won’t Engage

1. **Incorrect high pressure line plumbing** – Correct plumbing as shown on installation instructions included with PTO.
2. **Incorrect electrical wiring** – Correct wiring as shown on wiring diagram in installation instructions included with PTO.
3. **Restriction in pressure line** – Check hose and fittings for obstructions.

### Oil Leakage

1. **Oil seal failure** – Replace worn seal.
2. **Broken gasket** – Replace gaskets.
3. **Crack or hole in housing** – Replace housing.

### General

Before disassembling Power Take-Offs, carefully note the arrangement of the gears, output shaft, shift rod and fork.
