

Riser Clamps

Proven Lighter Weight, Buoyant Designs

Innovative Solutions:

Time may be money, but in the Oil & Gas industry, so is weight. Parker's patented riser clamp designs are saving Oil & Gas drilling companies both, featuring:

- Lighter, more buoyant HDPE riser clamps that replace heavier metal or urethane clamps
- Time-saving, easier to assemble designs that fit existing riser configurations
- Customized configurations

Call Parker's engineering and material experts to learn how we can work together using the latest technologies to design and manufacture custom riser clamp solutions that are lighter weight, time-saving, and durable.

Key Benefits:

Custom Engineered Designs

- Riser and MUX Clamp Designs
- Custom Coloring & Branding
- Tight or Loose Line Fit to Meet Specifications
- Profiles to Fit Existing Envelope

Increased Buoyancy

- Lighter Weight
- Buoyant Material

Robust Materials of Construction

- Rust Proof
- UV Resistant

Fast Assembly

- Single-piece Hinge Design
- Reduced Number of Parts
- Molded-in Fastening Features
