Patented Filtration Technology for the Prevention of Airborne Diseases in Agricultural Environments

Reduce risk, increase profits, and improve air quality at your facility. All it takes is one costly outbreak from any number of common diseases to significantly impact your swine or poultry population, production, and business. Investing in Parker’s high-quality air pathogen barrier filters can protect your livestock from catastrophic effects of PRRS, PED, influenza, foot-and-mouth disease, Aujeszky’s, M-hyo, infectious coryza, avian influenza, Newcastle disease, and bronchitis. And as farmers brace for the possible spread of African swine fever to the U.S., Canada and Mexico markets it is more important than ever to trap airborne viruses and the dust particles they travel on before they enter your livestock facilities.

Applications:
- Evaporating cooling systems
- Cool cell wall
- Attic filtration
- Eave filtration

Contact Information:

Product Features and Benefits:
- Patented, MERV 16-rated pathogen barrier, 6" deep, with Log 9 viral efficiency
- 100% synthetic, moisture-resistant, gradient density, media will not support microbial growth
- High-strength, mechanical locking structure reduces possibility of damage during handling or installation, further reducing the risk of airborne illness to livestock
- Media pack is fully scaled around the perimeter into the frame eliminating air bypass
- Proprietary, patented pleating technology delivers lower airflow resistance and higher dust holding capacity than the V-Bank option
- Factory installed upstream and downstream gasket eliminates air bypass
- Lightweight, compact construction simplifies replacement and lowers shipping cost
- Patented high efficiency media provides industry leading airflow at low resistance
- All-plastic construction fully incinerable
PurAg® SlimBox

Vastly improved air quality for your agricultural facility

Parker HVAC offers complete air filtration solutions that meet the tough demands of farming facilities. Ask about our pre-filters, frames, and housings to protect the air quality – and ultimately – your animals from disease-causing viruses.

Specifications

The Parker SlimBox filter installs easily into the filter grid frame, eave housings, attic housings, or metal filter frame and is available in two standard compatible sizes.

Dimensional Drawings

Materials of Construction

- **Media**: 100% synthetic
- **Pleats**: E-Pleat technology – Embossed pleat pack with adhesive beads
- **Frame**: High-impact plastic frame panels
- **Sealant**: Hot melt adhesive
- **Gaskets**: 3/4” single header, air upstream side; 1/4” x 3/4” gasket on air entry and air downstream side of header

Notes:

1. Removal performance validated for Log 9 reduction of Aerosol PRRSV.
2. MERV 16 per ASHRAE 52.2-2012. Initial resistance 0.60” W.G. © 1968 CFM. Tested at 492 FPM on 24 x 24 x 6 filter size.
3. MERV-A 16-A per ASHRAE 52.2-2012 Appendix J.
4. Maximum operating temperature 180°F.

**WARNING**: This product can expose you to chemicals, including chromium, formaldehyde and styrene, which are known to the State of California to cause cancer, and lead, methanol, toluene, which is known to the State of California to cause birth defects and other reproductive harm.
